

CROATIAN NATIONAL BANK

BULLETIN No. 53 - OCTOBER, 2000

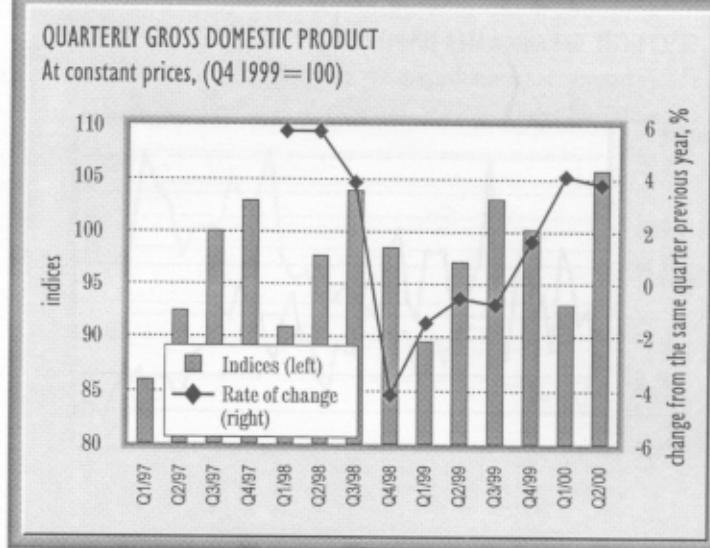

REAL SECTOR

The economic activity continued its rising tendency, which started in the fourth quarter of 1999, by a 3.7% increase in GDP in real terms in the second quarter of this year compared with the same period last year. The recovery in this quarter is primarily a result of increased exports of goods and services (11.1%) and household consumption (5.7%). A rise in imports (5.6%) together with a fall in capital investments (4.1%) and government consumption (1.1%) adversely influenced GDP.

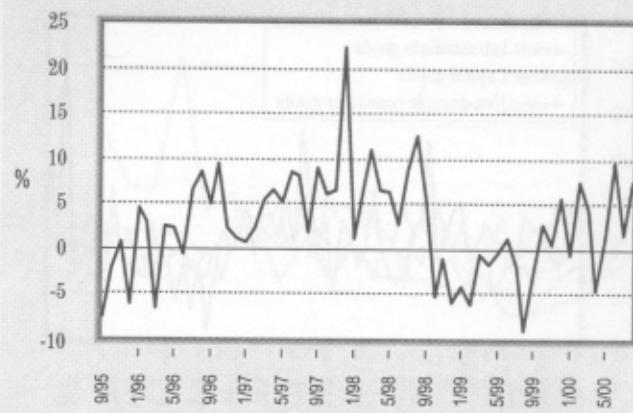

According to the NCEA, the growth was mainly influenced by hotels and restaurants, where the real growth rate of the gross value-added was 22.1%, followed by a 10.8% and 5.2% growth in trade and transportation, respectively. The one economic activity that declined in the second quarter was construction, the gross value-added of which fell by 7.3%. Evidently, in the conditions of recession in the economy in the last year, the effects of restrictive fiscal policy were predominant in construction.

In August, industrial production grew by 7.6% compared with the same month last year, whereas in the January - August period it increased by 3.2% on average. The industrial production growth in this year resulted from an increase in the processing industry (4.8%) and mining and extraction (1.5%), whereas energy supply fell by 5%. The industrial production growth was also accompanied by changes in its structure.

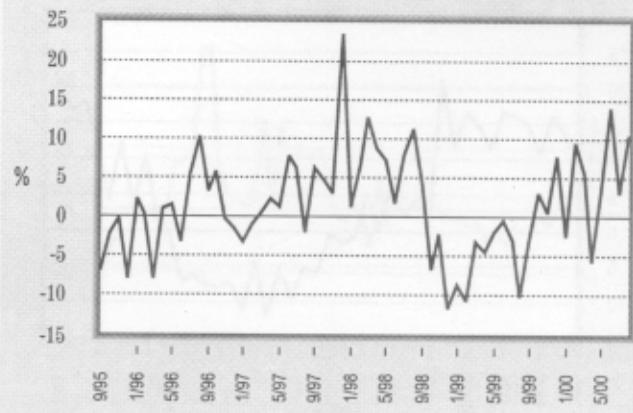

The divisions of the processing industry which recorded high growth rates in this year include: manufacture of radio, television and communication equipment (57%), and manufacture of chemicals (17.9%) and wood (10.3%). Production fell in manufacture of other transport equipment (8.2%) and wearing apparel (5.8%).

Goods exports, in terms of the kuna, increased by 18.7% in the first eight months of this year, compared with the same period of 1999, whereas imports grew by 15.7%. As a result of appreciation of the dollar against the kuna, the growth rates of exports and imports were considerably lower in terms of the dollar, but still positive. Exports and imports in dollars increased by 3% and 0.4%, respectively. Exports of industrial products grew less than overall exports, amounting to 17.5% in kuna terms and 1.9% in dollar terms. Although overall exports of goods increased, exports in dollars declined in certain industries. Among these industries exports decreased most in manufacture of food products and beverages (23.6%), manufacture of wearing apparel (20.45%) and manufacture of other transport equipment (12.1%). A high growth rate of exports to EU countries (20.4% in dollar terms) was particularly encouraging; it could, along with tariff concessions, result in a more favorable influence of merchandise trade on economic activity.

In August, tourists' night-stays amounted to 13 million 321 thousand, which is the largest number recorded this year, and a 37.1% increase compared with the same month last year. Foreign tourists' night-stays, accounting for almost 90% of total night-stays in August, increased by 44.7%, whereas domestic tourists' night-stays declined by 5.3%. The cumulation of night-stays in the first eight months of 2000, representing the major part of the season, shows a 44.6% increase in total night-stays compared to the same period last year, and a 21.8% increase compared with the first eight months of 1999. These indicators demonstrate a continuation of high growth rates of gross value-added in hotel and restaurant activity in the third quarter, compared with 1999, thus contributing significantly to GDP growth.

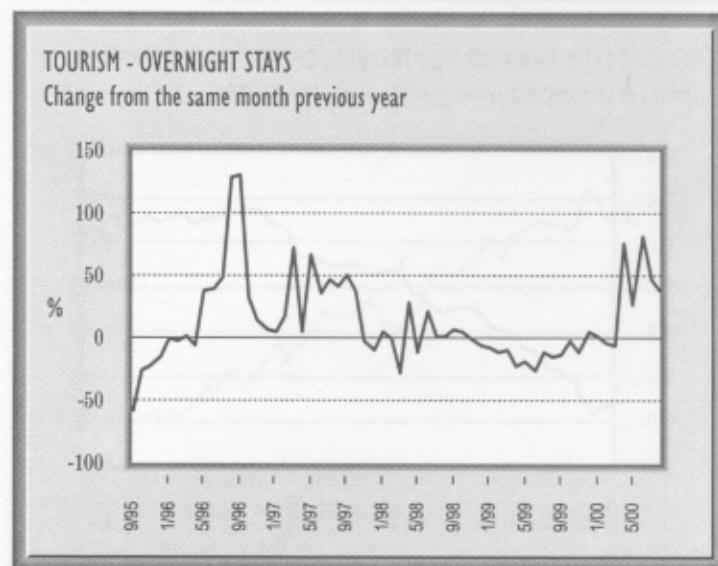

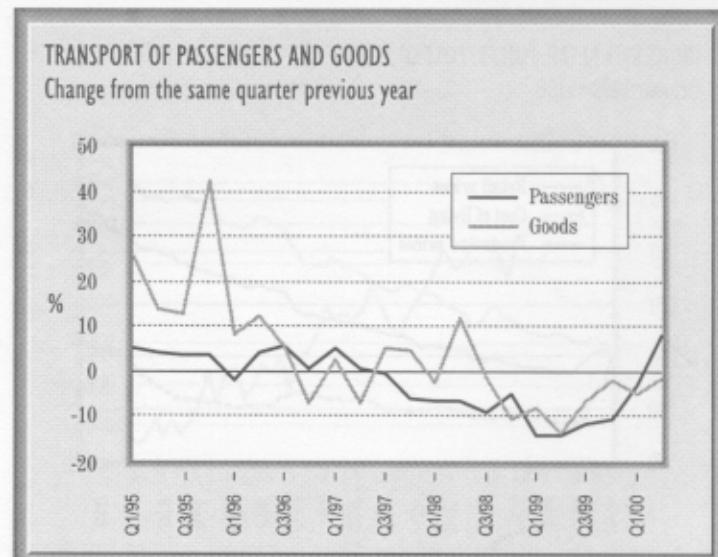

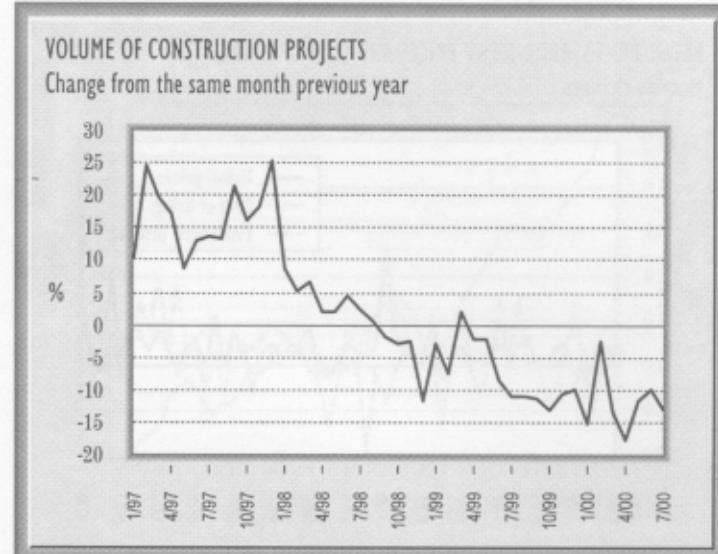

In August, retail trade turnover continued to rise at a high rate. Its nominal growth amounted to 33.9% compared to August 1999, whereas the increase in real terms amounted to 25.1%. The cumulative index of retail trade increased in the first eight months by 20.9% in nominal and 14.1% in real terms compared with 1999. Even if the effects of increased tourist consumption are taken into account, it is evident that a domestic component of household consumption will provide a powerful incentive to GDP growth in the third quarter.

In July, compared with the same month in 1999, the index of the physical volume of construction projects was on the decline for the sixteenth consecutive month. The cumulative index of the volume of construction projects in the first seven months of this year shows a 12.2% decrease compared with the same period last year. As a result of the high rates of decline and expectations of further fiscal contractions, a positive effect of construction on GDP in the third quarter is not likely to occur.

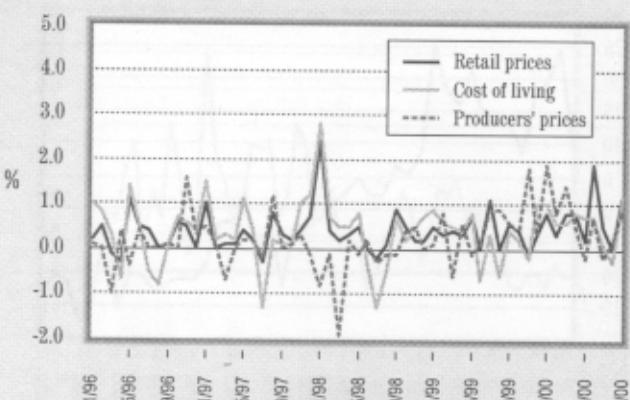

PRICES

In September there was a significant increase in retail prices and cost of living by 1.2%, compared with the previous month, whereas industrial product prices grew at a somewhat slower rate of 0.9%.

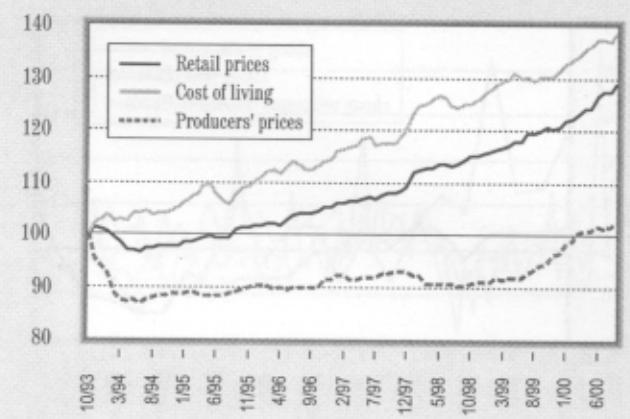

The year-on-year inflation rate, calculated on the basis of developments in the retail price index, grew from 6.5% in August to 7.1% in September, thus exceeding the highest year-on-year price growth of 7%, achieved in June. In September, i.e. at the beginning of the school year, schoolbook prices usually go up. Thus educational media rose by an average of 19.7%, compared with August. In addition, the expected seasonal growth in the prices of autumn and winter

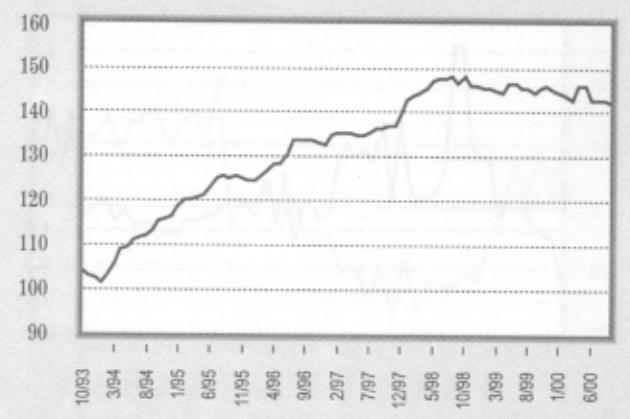

RETAIL PRICES, PRODUCERS' PRICES AND COST OF LIVING Monthly changes

INDICES OF RETAIL PRICES, COST OF LIVING AND PRODUCERS' PRICES October 1993 = 100

RELATIVE PRICE INDEX FOR NON-TRADABLE GOODS (prices of services relative to goods' prices), 1992 = 100

clothing was also recorded, causing an increase in finished textile products by 1.5%, compared with the previous month. Owing to an increase in prices of antipyretic agents by almost 90%, in September this year medical supplies prices grew by an average of 9.8% on the monthly level. An increase in transportation services prices by 1.7%, compared with August, is most likely a postponed impact of the growth in petroleum product prices. Compared with the previous years, in September the usual seasonal decrease in agricultural product prices failed due to this year's drought. Agricultural products went up by 4.3% compared with August.

Energy producers' prices in September increased by 1.4%, the prices of intermediate and capital goods by 1.3%, non-durable consumer goods by 0.4%, while the prices of durable consumer goods remained unchanged. The year-on-year inflation rate measured by the developments in producers price index related to industrial products grew from 8.7% in August to 8.9% in September.

EMPLOYMENT AND WAGES

After an increase by 3,000 (0.9%) in August, registered unemployment approximated 350,000 at the end of that month. The economic recovery did not slow down the growth of registered unemployment, which increased by an average of 36,000 (11.3%) in the first eight months of this year, compared with the same period last year. According to provisional CBS-data, total employment in July was 1,335,000, which is 2,000 (0.1%) lower than in the previous month and 39,000 (2.8%) lower than in the corresponding month of 1999. In August labour decreased by 1,000 (0.1%), whereas it

fell by an average of 10,000 (0.6%) during this year, compared with the first eight months of 1999. Late in August this year the registered unemployment rate, which grew constantly along with unemployment registered with the Croatian Employment Service, reached 20.8%.

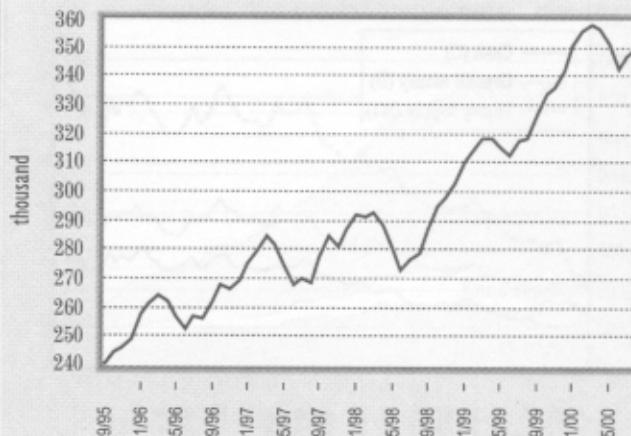

Continuous growth of gross wages in real terms since 1995 was reversed in March this year, mainly as a result of reduced wages in the public sector and a decrease in labour costs. Gross wages paid in the first eight months of this year rose by an average of 8.3% in nominal terms and 3.6% in real terms, compared with the same period of 1999. This growth was the result of a high level of wages reached in late 1999. Due to tax reductions, net wages decreased at a somewhat slower rate than gross wages. The year-on-year net wages growth index of 9% in nominal terms and 4.2% in real terms was higher than the growth of gross wages.

MONETARY DEVELOPMENTS

Data on monetary developments in August reveal the same trends that were observed in the preceding months. Total liquid assets (all its components) continued to grow, while credits continued to stagnate. The relations between the state and the banks did not change considerably compared with previous months, while net foreign assets grew significantly.

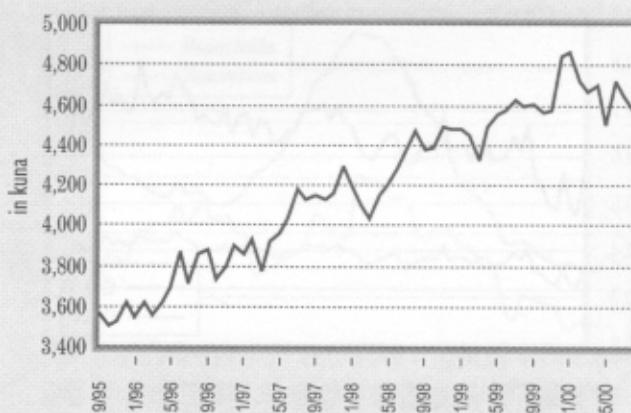

Money supply grew by HRK 0.6bn in August and at the end of the month it stood at HRK 17.8bn. This was due exclusively to an increase in deposit money, which continued its trend of robust growth from previous months. Deposit money in August grew by HRK 0.6bn and at the end of the month it amounted to HRK 11.3bn. This month again, the corporate sector had the strongest growth in deposit

Relative to the same month previous year

money. Currency in circulation stagnated, compared with July. Its high level in July, achieved as a result of months-long strong growth, was sufficient to meet even the seasonally-induced high demand. Continued months-long strong growth in deposit money caused a noticeable decrease in the ratio of currency in circulation and deposit money, to the advantage of deposit money.

Seasonally adjusted and trend values confirm such developments. Money supply this year grows at an average trend rate of 1.9%¹ and deposit money at a rate of 3.8%. The trend value of money supply grew by 13.1% and of deposit money by as much as 26.3%, compared with the same month last year.

Foreign deposits also grew to a great extent in August (by HRK 1.3bn) and at the end of the month they stood at HRK 43.4bn. This trend can also be seen as the continuation of strong growth in the previous months. Even kuna deposits grew substantially in August.

As a result of these developments, total liquid assets increased by HRK 2.6bn and at the end of August they were HRK 68.3bn. Their trend value in August this year was 15% higher than in August last year and the trend value's average monthly growth rate this year was 1.6%.

Data such as these prove that there was a basic growth in all monetary aggregates and not only a seasonally induced occurrence, which additionally increases the monetary aggregates' growth during the summer months.

Unfortunately, bank lending too continued its trend from previ-

¹ $\sqrt{\frac{VIII\ 2000}{I\ 2000}} * 100-100$

January has been excluded from the calculation of the rate, due to strong contraction – M1 shock. See previous information.

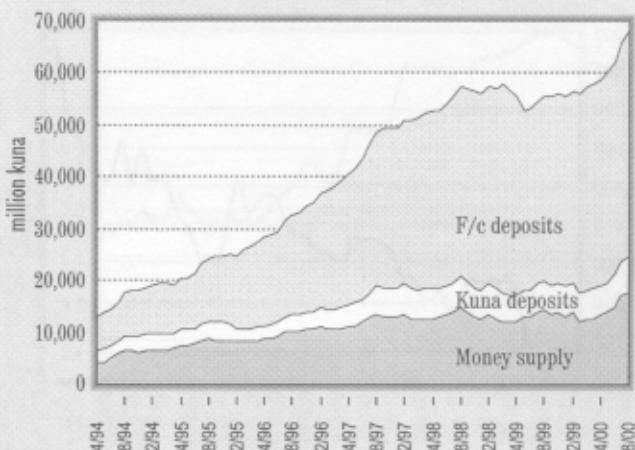

ous months and remained wholly stagnant in August. There was a mild increase in retail lending, but this was fully offset by an equally intensive decrease in corporate lending. The stagnation in bank lending has been a trend for over a year now and so far there are no signs that the trend will change, despite continued high liquidity of the banking system and a fall in interest rates. Bank lending to the private sector at the end of the month stood at HRK 57.4bn, while a year ago it was HRK 57.9bn.

Compared with July, the relations between the central government and the banks did not change. Since no bonds were regularly falling due for repurchase in August, nor were there any extraordinary inflows into the state treasury which would cause an increase in government deposits, there were no major changes in any of the categories.

By contrast, net foreign assets of the banking system increased considerably. As net domestic assets persistently stagnated, the growth in net foreign assets continued to be dominant in creating monetary aggregates. Net foreign assets grew by HRK 2.5bn in August, mainly due to an increase in commercial banks' foreign assets and at the end of the month they were HRK 28.7bn. The net foreign assets trend value was 66.5% higher than in August last year, and its average monthly growth rate this year was 3.1%².

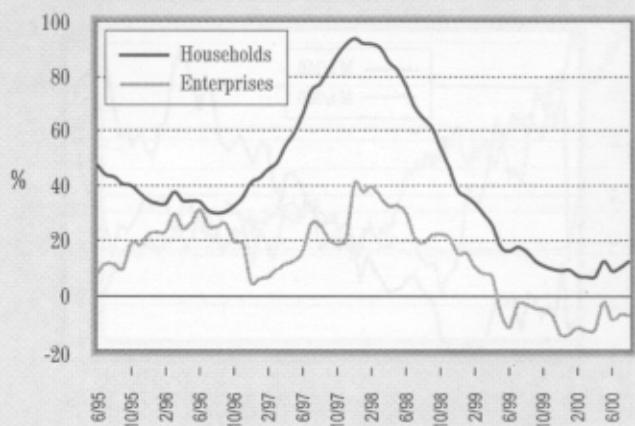

International reserves of the central bank were HRK 3.4bn at the end of September, equal to the level at the end of August. There were no foreign exchange auctions in September and August. With regard to its kuna activities, the central bank was also inactive. The central government is currently not indebted to the central bank. Banks

also kept to a minimum their central bank borrowing. Due to good liquidity of the system, the Lombard facility was used only twice in September; on September 1, amounting to HRK 125m and on September 25, amounting to HRK 12.5m. Previously extended liquidity loans to banks with liquidity problems continued to stagnate at HRK 200m.

In September, the reserve money increased by only HRK 65m. The growth was due exclusively to an increase in banks' deposits and reserve requirements, which stood at HRK 4.7bn at the end of September. Cash outside banks decreased in September (CNB data). The average balance in the settlement accounts was HRK 556m, which is only slightly less than last month, indicating further good liquidity of banks. Foreign exchange reserve requirements grew compared to August, also due to an increase in deposits, and stood at HRK 5.5bn at the end of September.

CNB bills, both kuna and foreign exchange, were on a slight decrease compared to August. There were several reasons for that. In the expectation of changes in the calculation of reserve requirements, banks were not inclined towards investing their free reserves. Continued increase in both reserve requirements exhausted a part of liquidity, which banks tried to compensate for by smaller purchases of CNB bills. In addition, in the absence of their need for Lombard loans, the banks lost the motivation to keep securities they did not need. Nevertheless, at the end of September, kuna and foreign exchange CNB bills amounted to a high HRK 4bn, which is only 0.4bn less than at the end of August.

EXCHANGE RATE

The nominal appreciation of the kuna against the Euro that is seasonally common over the sum-

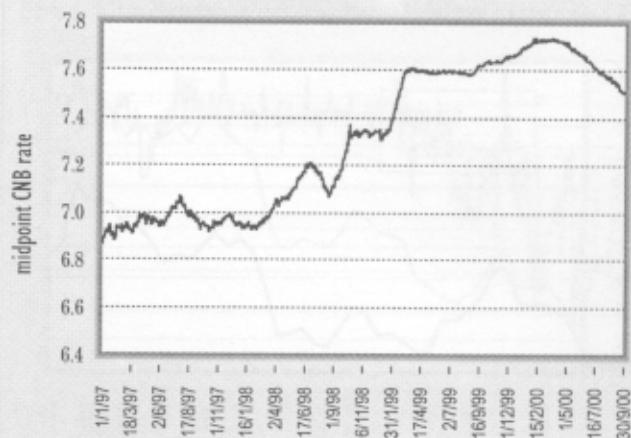

mer months continued in September as well. The average monthly exchange rate of the kuna strengthened nominally by 0.6% compared with the last month. Since the central bank did not intervene in the foreign exchange market in September, the exchange rate developments reflected the developments in the interbank foreign exchange market. The Euro fell from HRK 7.68 at the end of last year, to HRK 7.51 at the end of September. The total nominal appreciation of the kuna against the Euro was 2.2% in the first nine months of 2000.

The increase in the foreign exchange supply was caused by an inflow of foreign exchange from the issuance of bonds to the Japanese capital market and the successful tourist season. Foreign exchange inflow is (among others) expected from an additional government borrowing from abroad in the last quarter of 2000.

Consistent with the weakening of the Euro against the American dollar, and despite a co-ordinated intervention of the largest central banks in the world, the average exchange rate of the kuna against the dollar depreciated by a high 3.4% in September. Since the beginning of the year, the nominal kuna depreciation was 11.5% against the dollar and 2% against the basket of currencies (in which the dollar accounts for 30.7% and Euro for 66.2%). Compared to the previous month, the nominal effective exchange rate of the kuna depreciated by 0.7% in September.

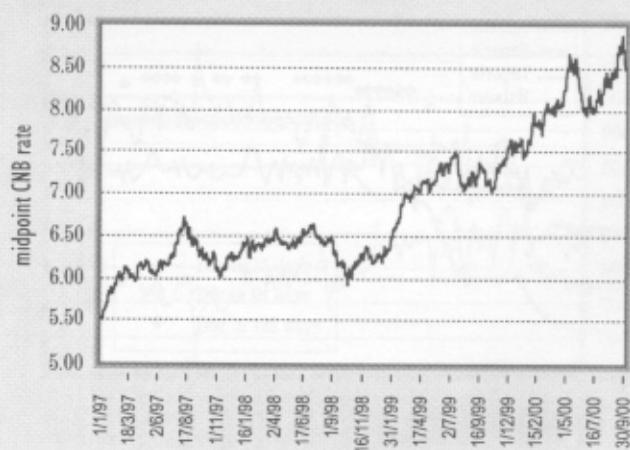

The real effective exchange rate of the kuna (with retail prices) appreciated in July by 0.7% compared with the month before, and 1.7% compared with December 1999. The average index of the real effective exchange rate of the kuna (with retail prices) in the first seven months of this year grew by 2.8% compared with the same period last year.

BALANCE OF PAYMENTS

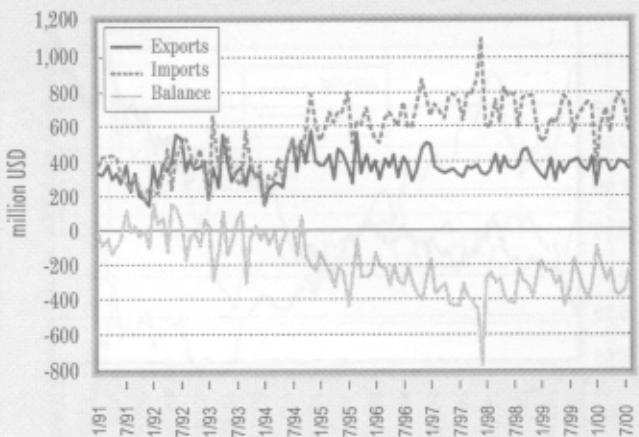

Following a mild recovery at the end of 1999, exports have stagnated during 2000. Cumulative exports in the first eight months of this year were USD 2,845.3m, a 3% increase compared with the same period last year. Due to GDP growth, imports showed signs of recovery in the same period and started to increase again. In the first eight months of 2000, imports increased by 0.4% compared with the same period of 1999 and were USD 4,976.5m for the January-August period of 2000.

Consequently, the merchandise trade deficit for the January-August period of 2000 fell by 2.9% compared with the same period of 1999. The coverage of imports by exports in the first eight months of 2000 was 57.2%, a 1.5 percentage point increase compared to the same period of 1999. Among SITC sectors with a significant share in the merchandise trade, exports of miscellaneous ready-made products decreased most, by 12.0% (exports were USD 573.7m in the January-August period of 2000), while imports of these products rose by 8.4% (imports in this cumulative period of 2000 were USD 628.7m).

Continuing a downward trend started in July, exports fell slightly in August 2000 compared to August 1999. Exports went down by 12.3%, while imports went up by 2.0% in August 2000 compared with the same month of 1999. These movements resulted in the merchandise trade deficit of USD 222.5m, or 35.9% more than August 1999. It should be noted that this was not due to seasonal effects of the series.

Let us remember that, due to a change in methodology for processing data introduced in January 2000, the Central Bureau of Statistics

tics is continually revising monthly data up to the end of the final processing of the year (in the middle of the next year). Monthly data for the current year are thus considered provisional.

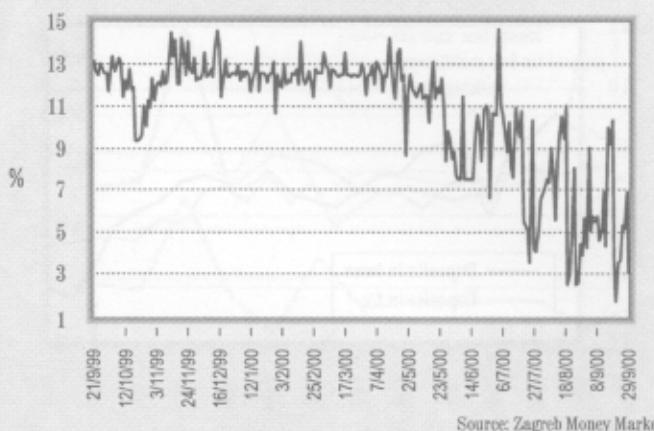

MONEY MARKET AND INTEREST RATES

After having fluctuated between 1.7% and 10.25%, the average interest rate in daily transactions on the Zagreb Money Market decreased from 6.57% in August to 5.63%. At the same time, average daily transactions increased by almost 40%. The average interest rate on callable loans, accounting for as much as 70% of the total loans extended, was 3% or lower. The relation between supply and demand has not substantially changed, with supply still almost twice exceeding demand.

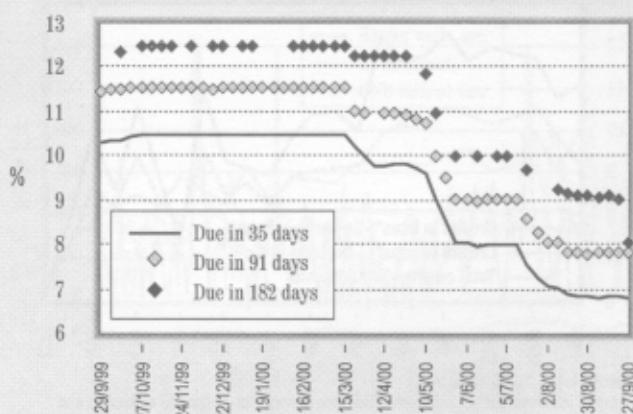

In comparison with August, overnight transactions on the interbank market decreased by 33%, while average interest rates in overnight transactions amounted to 3.26%. The overnight ZIBOR stood at 2.25%. These low interest rates have resulted from the recently improved liquidity and consolidation of the banking system.

The interest rates charged on short term CNB and Ministry of Finance securities were also considerably affected by these developments. In the last six months the average interest rate on the money market has dropped by over 50%. On the other hand, the average interest rates on kuna CNB bills and Ministry of Finance treasury bills decreased by a moderate 35% and 27%, respectively. The interest rate on 91-day CNB bills was 7.80%, compared with the 8.60% interest rate charged on 91-day treasury bills. Therefore it is not surprising that the purchase of kuna CNB bills has declined by HRK 550m in

Source: Agency for Domestic Payments

the last two months, while the purchase of treasury bills has grown by HRK 730m in the same period. However, average interest rates on foreign currency CNB bills quoted at latest auctions remained stagnant, but their purchase was on the decrease. The interest rates on USD bills were even better, although not as good as in the beginning of the year. That is why the purchase of EUR bills prevailed, which corresponds to the fact that Croatian citizens' savings deposits are mostly in German marks.

Commercial banks' interest rates continued their downward trend through August. Compared with early 2000, the average interest rate on kuna loans without the currency clause fell by 5.4 percentage points, while the average interest rate on kuna loans with the currency clause decreased by 1.5 percentage points. It should be noted that these loans account for only 26% of the total amount of newly extended loans. The interest rate on long term loans remained at a steady 10.8%. The sharpest decrease was observed in the interest rates charged on short-term loans to enterprises. In keeping with banks' estimates made a few months ago, the average interest rate in August stood at 6.0%, the lowest level up to now. Compared to July, August deposit interest rates did not come down further and even rose slightly. This rise could be due to a growing share of time deposits with increased interest rates.

The above mentioned trends brought down the interest rate spread to below 7 percentage points.

Despite a gradual decline in lending and deposit interest rates, especially those charged on transaction and sight deposits (97.5% of newly granted loans account for overdraft facilities in citizens' current accounts), the average interest rate on short term loans granted to

households remained at approximately 20.7%. Taking this into consideration, together with the interest rate on current and giro accounts, amounting to 1.8% in August, we can easily calculate banks' earnings derived from granting loans to citizens.

GOVERNMENT BUDGET

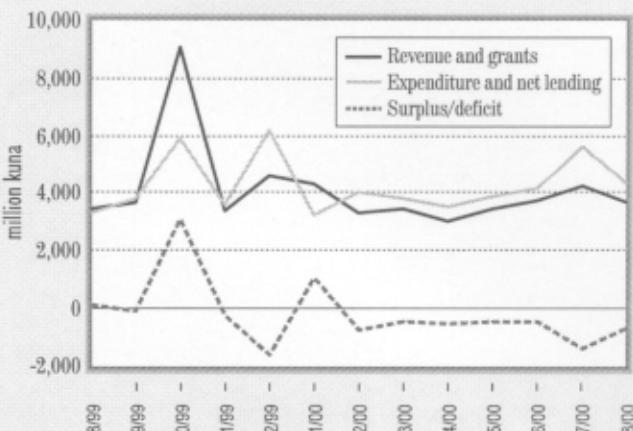

The central government budgetary deficit in August amounted to HRK 655m. Both the deficit and the repayment of external debt (London and Paris club) were financed mainly from foreign sources. However, domestic sources were significant as well, especially the additional HRK 300m of Ministry of Finance treasury bills purchased in August. In the first eight months of 2000, the aggregate deficit of the central government totalled HRK 3.3bn. This is due to an unsteady inflow of capital revenues, most of them projected for as late as the last quarter of this year.

Compared with the same month last year, the revenues collected in August rose by 5.6%, amounting to HRK 3,672bn. Value added tax and excise revenues have risen the most; their year-on-year growth amounted to 23.7% and 15.6%, respectively.

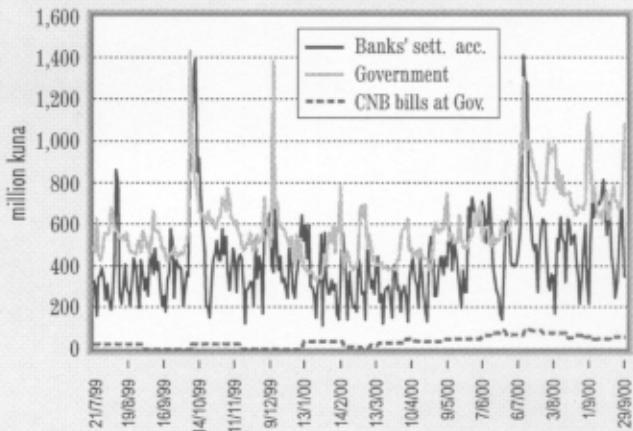

On the one hand, considerable value added tax revenues were probably a consequence of a very good tourist season but, on the other, they partly resulted from realized compensation deals.

August expenditures amounted to HRK 4,328bn, or HRK 1.0bn (28.8%) more than in the same month last year. This resulted from a considerable increase in expenditures for subsidies and other current transfers. It should be pointed out that 69% of the earmarked funds were used for wages and contributions in the first eight months so that a shortfall in funds is likely to occur by the end of 2000.

¹⁾ The privatisation of Privredna banka Zagreb brought about a one-off decrease in its balance sheet of 2,759.4 million kuna. Loans in f/c to public enterprises diminished on the assets side and at the same time obligations to Republic of Croatia arising from foreign credits diminished on the liabilities side. Loans in f/c to public enterprises are listed under assets item "2.2. Claims on other domestic sectors". Obligations to the Republic of Croatia arising from loans in f/c are listed under assets item "2.1 Claims on central government and funds (net)".

Classification and Presentation of Data on Claims and Liabilities

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. The institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and other financial institutions. The central bank is the Croatian National Bank (CNB). Deposit money banks are institutions the Croatian National Bank has granted permission to perform banking business services in accordance with the Law on Banks, including savings banks during a transition period. Data on DMBs does not include claims and liabilities of banks undergoing bankruptcy procedures, nor former branches of banks with their headquarters in the former Yugoslavia. Other banking institutions comprise housing savings banks, savings and loan cooperatives and investment funds. Other financial institutions are financial institutions not classified as banks or other banking institutions (for example insurance companies)

The central government and funds comprises government institutions including Croatian Roads Authority, State Agency for Deposit Insurance and Bank rehabilitation and Croatian Guarantee Agency, and following central government funds: Croatian Health Insurance Institute, Croatian Pension Insurance Institute, Croatian Employment Service, Croatian Privatization Fund, Public Water Management Fund and Croatian Bank for Reconstruction and Development. Other domestic sectors are local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local government (which comprises local government authorities and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their

kuna equivalent at the midpoint CNB exchange rate at the end of the reporting period.

Table A1: Monetary and Credit Aggregates

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates. In September 1999, all the monetary aggregates were revised. In previous publications of the CNB, data on claims and obligations of savings banks were not included in the compilation of the monetary aggregates.

Reserve money has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

Money (M1) is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with CNB by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

Broadest money (M4) comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1).

Net domestic assets are defined as a difference between total liquid assets and foreign assets (net).

Domestic credit comprises DMBs' claims on other domestic sectors, other banking institutions and other financial institutions.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in Monetary Aggregate M1 amounted to 259.3 million kuna and in Monetary Aggregate M4 amounted to 4,035.8 million kuna. Data for June 1999 are comparable to data for July 1999 if Bank Placements are increased by 3,513.5 million kuna.

Table B1: Monetary Survey

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

Foreign assets (net) are the difference between total foreign assets and total foreign liabilities of the CNB and DMBs.

Domestic credit is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the CNB and DMBs.

Money is the sum of currency outside banks, deposits by other banking institutions with the CNB, deposits by other domestic sectors with the CNB and DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

The items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while the item *Restricted and blocked deposits* represents the sum of corresponding items from the Monetary Authorities Accounts (excluding DMB's blocked deposits with the CNB) and DMB's Accounts. *Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total amounted to 4,296.3 million kuna. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Other items (net) are increased by 3,513.5 million kuna.

Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size

The table shows the total number of DMBs and savings banks which report monthly to the CNB. Their operation is shown in the DMB's accounts.

Special reporting requirements applied to savings banks until June 1995. Savings banks were not legally obliged to report on their operations, so that data up to June 1995 only to those savings banks that reported voluntarily to the CNB. From July 1995 on, the data cover all Savings Banks. In accordance with the Law on Banks, savings banks must meet the conditions set out in the law by December 31, 2001, or they will be liquidated.

The table also shows the classification of reporting DMBs and savings banks according to their total assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics.

Table C1: Monetary Authorities Accounts

The table reports data on claims and liabilities by monetary authorities. In September 1999, the data were revised, with savings banks being transferred for the subsector other banking institutions to the subsector banks. The whole data series has been revised accordingly.

Foreign assets include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims. *Claims on central government and funds* are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming timing differences between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

Claims on other domestic sectors are loans and overdue claims on other domestic sectors, including banks in bankruptcy proceedings.

Claims on DMBs are credit to DMBs, deposits by the CNB with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits

to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Short-term liquidity loans, which have been granted since the beginning of 1999, also serve to bridge liquidity problems. Other credits include interventive credits, special credits for bridging liquidity problems granted in the past (initial credits, prerehabilitation credits) and due but unpaid credits. Overdue claims on DMBs comprise settlement account overdrafts (until mid-1994) and banks' failure to correctly and promptly allocate and maintain statutory reserve requirements.

Since May 1999 claims on other domestic sectors include overdue claims on banks over which bankruptcy proceedings have been initiated. Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Claims on DMBs and Claims on other banking institutions were revised.

Reserve money consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the CNB, other banking institutions' deposits and other domestic sectors' deposits with the CNB. *DMBs' deposits* are: settlement account balances, statutory reserves deposited on a special account with the CNB as well as CNB bills on obligatory basis. *Deposits by other banking institutions* are: settlement account balances of housing savings banks. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances which, on the basis of legal acts are deposited at the Croatian National Bank.

Restricted and blocked deposits include required foreign exchange reserves, restricted deposits and blocked foreign exchange deposits. Banks and savings banks are required to place foreign exchange reserve deposits in accounts at the Croatian National Bank on the basis of certain foreign exchange deposits they hold. Restricted deposits are kuna funds set aside on the basis of court order or legal regulation and deposits of banks over which bankruptcy proceedings have been initiated. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

Foreign liabilities include use of IMF credits, liabilities to international financial institutions and foreign banks.

Central government and funds deposits are demand deposits and foreign currency deposits of the Republic of Croatia and republic funds with the CNB, and CNB bills purchased by central government institutions.

CNB bills are CNB bills on a voluntary basis in kuna and in f/c excluding CNB bills voluntarily purchased by central government institutions.

Capital accounts include reserves, provisions and the income and cost accounts.

Other items (net) are unclassified liabilities decreased by unclassified assets of the CNB's accounts.

Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Currency outside banks, DMB's cash in vaults, DMB's deposits and Deposits of Other Banking Institutions were changed. Since May 1999 including deposits of banks over which bankruptcy proceedings have been initiated.

Table D1: Deposit Money Banks' Accounts

DMBs accounts include data on DMBs' claims and liabilities. DMBs' mutual claims and liabilities are consolidated. In September 1999, the data was revised to include savings banks. The whole data series was revised accordingly.

Required reserves held at the Central Bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the Central Bank. Foreign exchange reserves include foreign exchange held in accounts at the Central Bank.

Foreign assets are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, deposits with foreign banks (including loro letters of credit and other collateral), securities, loans, equities.

Claims on central government and funds are the following forms of claims in kuna and foreign currency: securities and loans. The main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

Claims on other domestic sectors include the following claims in kuna and foreign currency: money market instruments, bonds, loans (including acceptances), and equities.

The same forms of kuna and foreign currency claims are included in claims on other banking institutions and other financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

The items *Demand deposits*, *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and other financial institutions.

Demand deposits include giro and current accounts balances and other transferable deposits, minus currency in the payment system, i.e. checks in banks' vaults and checks in collection.

Savings and time deposits are: kuna sight deposits as well as kuna time and notice deposits.

Foreign currency deposits are: foreign currency sight deposits as well as foreign currency time and notice deposits.

Bonds and money market instruments are: banks' liabilities for securities issued (net) and loans obtained.

Foreign liabilities comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, savings deposits (including loro letters of credit and other forms of collateral), time deposits, loans received and liabilities due.

Central government and funds' deposits are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

Credit from central bank comprises loans obtained from the CNB and deposits by the CNB with DMBs. Repurchase of securities is also considered and treated as loan.

Restricted and blocked deposits comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, other financial institutions, central government and funds as well as foreign legal entities and individuals; and households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

Capital accounts are share capital, profit or less in the current year, retained profit (loss), required reserves, other capital reserves and provisions for identified and unidentified losses

Other items (net) are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total DMBs' accounts amounted to 5 701.4 million kuna. On the assets side, most significant were: Claims on enterprises (4,378.7 million kuna) and Claims on households (701.4 million kuna). On the liabilities side, most significant were: Foreign currency deposits (3,443.7 million kuna), Foreign liabilities (1,024.6 million kuna) and Capital accounts (854.6 million kuna). Beginning in July 1999, the total amount of provisions for identified losses is shown within the Capital accounts line. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Capital accounts are increased by 3,513.5 million kuna. Other items have been corrected by small amounts.

Tables D2-D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

Table D2: Deposit Money Bank's Foreign Assets

This table shows DMBs' claims on foreign legal entities and individuals.

Foreign assets of DMB's comprise foreign assets in kuna and foreign currency.

Claims on foreign banks and *Claims on foreign nonbanks* (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency.,m

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Assets amounted to 402.3 million kuna. Through June 1999, some household f/c savings deposits were included in Demand deposits and f/c savings deposits.

Table D3: Deposit Money Banks' Claims on the Central Government and Funds

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

Bonds arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

Big bonds are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

Other claims are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans and equities.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Central Government and Funds amounted to 17.8 million kuna.

Table D4: Deposit Money Bank's Claims on Other Domestic Sectors

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: money market instruments, bonds, loans and advances (including acceptances and purchased claims), and equities and arrears.

Since October 1994, foreign currency loans can be granted only when DMB's simultaneously borrow abroad in their own name and for the account of the end-user.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Other Domestic Sector amounted to 5,088.0 million kuna. Data for June 1999 are comparable with data for July 1999 if the item Loans and Advances under Claims in kuna is increased by 2,904.3 million kuna, the item Shares and Participations is decreased by 520.3 million kuna, and if the item Loans and Advances under Claims in f/c is increased by 1,129.4 million kuna.

Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances, financial leases, payments made on the basis of guarantees and similar instruments and purchased claims.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' loans amounted to 4,463.3 million kuna. Data for June 1999 are comparable with data for July 1999 if total loans in kuna are increased by 2,972.6 million kuna, and total loans in f/c are increased by 840.9 million kuna.

Table D6: Demand Deposits with Deposit Money Banks

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and other financial institutions' giro and current accounts balances, minus currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection. Banks obligations arising from kuna payment instruments issued are included in the household sector.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Demand deposits with those banks amounted to 259.3 million kuna.

Table D7: Time and Savings Deposits with Deposit Money Banks

The table shows *Kuna savings and time deposits* by other domestic sectors, other banking institutions and other financial institutions with DMBs.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Time and Savings Deposits with those banks amounted to 323.7 million kuna. In July 1999, certain

deposits of local government, government, enterprises, other banking institutions and other financial institutions were reclassified from savings to time deposits.

Table D8: Foreign Currency Deposits with Deposit Money Banks

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and other financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Foreign Currency Deposits with those banks amounted to 3,443.7 million kuna.

Table D9: Bonds and Money Market Instruments

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and other financial institutions.

Money market instruments (net) comprise DMBs net liabilities for CNB bills, bills of exchange (issued and accepted) and other securities issued.

Bonds (net) comprise DMBs net liabilities for kuna and foreign currency bonds issued, as well as debt and hybrid instruments that under certain conditions may be included in the supplementary capital of banks.

Other domestic borrowings comprises loans received, reported total and classified by institutional sectors.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Bonds and Money Market Instruments amounted to 9 million kuna. In July 1999, certain debt and hybrid instruments were reclassified from Time and notice deposits to Bonds (net). The amount reclassified was 3,513.5 million kuna.

Table D10: Deposit Money Banks' Foreign Liabilities

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities and foreign kuna liabilities.

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments)

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Liabilities amounted to 1,024.6 million kuna.

Table D11: Central Government and Funds Deposits with Deposit Money Banks

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, savings deposits, kuna time and notice deposits, and kuna loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as savings deposits, foreign currency time and notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Central Government and Funds Deposits with those banks amounted to 193.5 million kuna.

Table D12: Restricted and Blocked Deposits with Deposit Money Banks

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, other financial institutions and foreign legal entities and individuals with DMBs.

Restricted and blocked deposits include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked foreign currency deposits.

Blocked foreign currency deposits include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Restricted and Blocked deposits with those banks amounted to 39.9 million kuna. In July 1999, data on blocked deposits of central government and of enterprises were revised.

Table E1: Housing Savings Banks' Accounts

Housing savings banks' accounts include data on claims and liabilities of the Croatian housing savings banks. All housing savings banks' claims and liabilities refer exclusively to domestic sectors.

Housing savings banks' required reserves held at the Central Bank include kuna vault cash and kuna funds held in accounts at the Central Bank.

Claims on central government and funds are claims in kuna on the Republic of Croatia and republic funds.

Claims on other domestic sectors include kuna loans to local government and households.

Claims on banks include loans extended to banks, as well as deposits with banks.

The item Time deposits includes local government and households time deposits.

Bonds and money market instruments are housing savings banks' liabilities for securities issued (net) and loans obtained.

Capital accounts include share capital, profit or loss in the current year, retained profit (loss), required reserves, other capital reserves, and provisions for identified and unidentified losses.

Other items (net) are unclassified liabilities decreased by unclassified assets.

Table F1 - Credit Rates of Croatian National Bank

The table shows interest rates used by the CNB to calculate and charge interest on loans and on all other claims.

Lending CNB interest rates are being set by special decrees of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 to September 11, 1996 interest rate charged by CNB on lombard credits has been 1.5 percentage point higher than the weighted average interest rate on CNB bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports weighted average interest rate on lombard credits. Interest rate in September 1996 is calculated as weighted average of interest rate applied in first 10 days of September 1996 (according to the regime mentioned above) and fixed interest rate applied since September 11, 1996.

Time series presented in the table contain certain breaches, due to changes in CNB's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for payments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems that are collateralized by CNB bills. Since December 16, 1998 this credit is incorporated in lombard credit, applying different interest rate for its usage within one day.

Data shown in column 7 refer, until December 1994 to interest rate on initial credits, and since March 18, 1998 to credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February 1999, to interest rates on short-term liquidity credits. Since December 1999 data show interest rates on short term liquidity credit over 3 months which is 1 percentage point higher than interest

rate on lombard credits. Interest rate on short-term liquidity credit up to 3 months is 0,5 percentage point higher than interest rate on lombard credits.

Interest rates reported in column 8 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 9. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other failure to fulfill financial obligations, in accordance with the late interest regulations (shown in column 10).

Until June 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 9). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for other failures to fulfill financial obligations, shown in column 10.

Table F2: Deposit Rates of Croatian National Bank

The table shows interest rates paid by the CNB on funds deposited with the CNB as well as on securities issued.

Interest rates paid by the CNB for appropriated statutory reserve funds are being set by the Council of the CNB. Until 7 October 1993, CNB was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, CNB paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on obligatory CNB bills are set by the Council of the CNB.

Until October 1993, interest rates on CNB bills on voluntary basis were also set by the Council of the CNB, while since November 1993, they have been set at CNB bills' auction sales. Congruently, since November 1993, columns 5, 6

and 7 report weighted average interest rates attained in auctions of the CNB bills.

Until October 1994, interest rates on CNB bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Since April 1998 column 9, 10, 11 report weighted average interest rates of the voluntary CNB bills in EUR and USD (until December 1998 in DEM and USD), due in 63, 91, 182 and 365 days attained in CNB bill's auctions as a weighted average of subscribed amounts in those two currencies.

Table F3: Deposit Money Banks' Reserves on Obligatory Basis

This table shows data on monthly averages of day-to-day balances of DMB's required reserves with the CNB. Savings banks are included beginning in July 1999, and the earlier data have not been revised.

Reserve requirement (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the CNB, or to maintain (in average) on their settlement accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this requirement by registering CNB bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base. Column 5 shows the portion of the reserve requirement banks are required to deposit on a special statutory reserves account with the CNB (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995 until May 1998, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the CNB and since May 1998 at least 60% of the amount).

Column 6 shows the percentage of the statutory reserves deposited with the CNB in the total reserve requirement.

Column 7 shows the total amount of other obligatory deposits with the CNB, including obligatory CNB bills, those voluntary CNB bills used by banks to maintain the prescribed minimal liquidity (LAR), special statutory

reserves (until July 1995) and statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the CNB on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average settlement account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the CNB bills on obligatory basis and inaccurately calculated special statutory reserves (until July 1995) and inaccurately calculated statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Table F4: Deposit Money Banks' Liquidity Indicators

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity. Savings banks are included beginning in July 1999. The past data has not been revised.

Column 3 shows free reserves, defined as bank's total reserves (on settlement accounts and in vaults) decreased by the minimal average settlement account and treasury balance, as prescribed by instruments of the CNB (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October

1994), regular loans for maintenance of day-to-day liquidity (until November 1994), use of funds exceeding those available on the bank's giro account (until October 1994), special credits for overcoming illiquidity problems (initial credits, credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), short-term liquidity credits (since February 1999) as well as outstanding liabilities due to the CNB.

Column 6 reports monthly average of day-to-day balances of CNB bills on voluntary basis in kuna (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 7 reports monthly average of day-to-day balances on CNB bills on voluntary basis in foreign currency (EUR and USD).

Table G1: Deposit Money Banks' Credit Rates

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis. Savings banks are not covered.

Columns 3 and 4 show interest rates on the interbank, daily and overnight money markets, according to information received from Money Market Zagreb. Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reported month, with the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Columns 8, 9, 10 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 11, 12 and 13) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

Table G2: Deposit Money Banks' Deposit Rates

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis. Savings banks are not covered.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other foreign currencies are not included in the data reported in this table.

The basis for calculation of weighted averages is the end-of-month balance of deposits. Kuna and foreign currency time and savings deposits are exceptions; for them weighted averages are calculated (since July 1995) based on the amounts of those deposits received during the reported month. Weighted averages of interest rates on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as collateral for credit are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not

included into the calculation of weighted averages.

Table G3: Deposit Money Banks' Trade with Foreign Exchange

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, CNB). Source of data are DMBs periodic reports on trading with foreign exchange, sent to the CNB on a regular basis. The amounts are stated in Euro (EUR), converted from other foreign currencies using the CNB's midpoint exchange rate (reporting period average). Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of Ministry of Finance.

Table H1-H5: Balance of Payments

The balance of payments is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports of the Central Bureau of Statistics, the Croatian Health Insurance Institute, the Payments Institute, Commercial banks, enterprises and the Croatian national Bank, as well as research by the Tourism Institute and the Croatian National Bank.

Balance of Payments of the Republic of Croatia data are recorded in US dollars (USD) and national currency (HRK). The balance of payments in both reporting currencies is compiled using the same sources of information and the same principles regarding the scope of transactions covered and the procedures for composing particular positions. Depending on the sources of data available, conversion of transaction values from the original currencies into reporting currencies is performed:

- a) by applying the midpoint exchange rate of the Croatian National Bank on the date of the transaction;
- b) by applying monthly and quarterly average midpoint exchange rates of the Croatian National Bank;
- c) by applying the average monthly exchange rate versus the US dollar when assessing transactions representing the difference between

balances evaluated according to the exchange rate applicable at the end of the period.

Exports and Imports are shown on an f.o.b. basis. The basic data source for these items is the Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia. The data of the Central Bureau of Statistics are modified in accordance with the compilation method of the IMF: merchandise imports, which are shown in the Central Bureau of Statistics' report in c.i.f. terms, are corrected to f.o.b. (corrected for classification) and both imports and exports are corrected so that the coverage includes goods defined as such in the balance of payments methodology but not included in the statistics on merchandise trade.

Regarding exports, beginning with the first quarter of 1999, coverage has been increased via estimates of purchases by individual foreign travelers in the Republic of Croatia. These estimates are based on the Survey on Consumption of Foreign Travelers in Croatia carried out jointly by the Croatian National Bank and the Institute for Tourism. Regarding imports, the difference between c.i.f. and f.o.b. is estimated on the basis of research studies of the CNB on samples of the largest importers, and the resulting value of f.o.b. imports is adjusted on the basis of foreign payments for repairs of ships as well as supply purchases in foreign ports, as well as estimates of the purchases of individual Croatian citizens abroad, obtained via a research study of the CNB. From the first quarter of 1999 on, estimates are based on the Survey on Consumption of Domestic Travelers Abroad carried out jointly by the Croatian National Bank and the Institute for Tourism. For the 1993 to 1996 period, merchandise imports from the merchandise trade statistics are modified by estimates of imports in duty-free zones (prepared by the CNB), while from 1997 on, data on these imports are included in the merchandise trade statistics.

Beginning with the first quarter of 1999, income and expenditures from transport services are compiled on the basis of data from a new CNB research project on international transport services, with two exceptions: first, income and expenditures from road transport are compiled via data on realized foreign payments, and second, a portion of expenditures on transport services for transport of goods imported to the Republic of Croatia are based on a survey of the largest Croatia importers. This survey is carried

out in the context of the reformulation of data on imports from a c.i.f. to an f.o.b. basis.

Income from travel-tourism is calculated on the basis of the Survey on the Consumption of Foreign Travelers in Croatia starting in the first quarter of 1999. This survey is carried out jointly by the Croatian National Bank and the Institute for Tourism. Additional data from the Croatian Health Insurance Institute on health services provided to non-residents is also used.

Expenditures from travel-tourism is, starting in the first quarter of 1999, based on the results of the Survey on the Consumption of Domestic Travelers Abroad, and is supplemented by data on foreign exchange expenditures of the Croatian Health Insurance Institute.

Other services includes data from the foreign payments statistics which related to investment projects abroad, customs clearing services, representation fees, insurance services, postal services and the costs of Croatian representative offices overseas. To this category is added a part of unclassified services which can be explained as a linear trend, as well as estimates of the expenditures of international peacekeeping and humanitarian missions for goods and services in the Republic of Croatia, based on research by the Croatian National Bank.

The income account includes data from the foreign payments statistics on payments on the basis of interest, data from CNB research on income paid from foreign direct and portfolio investment of the private sector, Croatian National Bank data and Payments Institute data on income paid from foreign portfolio investment in the official sector and estimates of the factor income of resident peacekeeping and humanitarian missions in the Republic of Croatia, based on research of the Croatian National Bank. For the period 1993 to 1996, data on foreign direct investment do not include data on retained profit.

Current transfers to the government include data from the foreign payments statistics on the payment of pensions and other social transfers, monetary support and gifts, as well as data from the merchandise trade statistics of the Republic of Croatia on imports and exports of goods without payment obligation.

Income from transfers to other sectors includes data from the foreign payments statistics on the total value of foreign exchange transfers received from abroad. To this is added an estimate for unregistered transfers. This estimate

is seen as 15% of the difference between the unexplained foreign exchange inflows and outflows of the household sector.

The foreign exchange receipts of the household sector include the purchase of foreign cash at exchange offices from residents and deposits of foreign cash in foreign exchange accounts of residents at domestic banks. Payments made abroad and income earned through business trips, education and training, tourist receipts and other tourist income are added to this. The total inflow is decreased by: estimated tourist income and estimates of purchases by individual foreign tourists in the Republic of Croatia (Survey on the Consumption of Foreign Tourists in Croatia carried out jointly by the Croatian National Bank and Institute of Tourism) plus consumption of goods and services by members of peacekeeping and humanitarian missions in the Republic of Croatia.

The foreign exchange expenditures of the household sector include purchases of foreign cash by exchange offices and withdrawals of foreign cash from households' foreign exchange accounts at domestic banks. Realized foreign payments and expenditures from business trips, education and training, tourist payments and other tourist expenditures are added to this. The total outflow is decreased by: individuals' expenditures for goods abroad and expenditures for foreign tourism by residents.

Expenditures on transfers of other sectors is based on foreign payments data on the total value of foreign exchange transfers abroad.

Capital accounts are compiled from data on realized foreign payments by migrants (income and expenditures).

Foreign direct and portfolio investment includes data on those investments from the research of the CNB and data from the securities register of the official sector (Central bank and central government) at the Croatian National Bank and Payments Institute. In the 1993 to 1996 period, data on foreign direct investment of the private sector (banks and other sectors) do not include direct foreign debt investment, nor retained profit of the investor.

Other investment is classified according to the following institutional sectors: Croatian National Bank, Government, Banks and Other. The Government sector comprises central government, local government and local funds. The Banking Sector comprises commercial banks.

Assets--trade credit has been compiled since the first quarter of 1996. It includes advances paid for goods imports by Croatian importers. Starting in the first quarter of 1999, it includes loans with maturities below 90 days given by Croatian exporters to foreign buyers as well as long-term and short-term (from 91 days to 1 year) trade credits granted to the government and other sectors.

Assets -- credit includes data on loans granted abroad, classified according to institutional sectors. Data are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Assets--foreign exchange and deposits--banks shows the change in the total liquid foreign exchange of banks authorized to do business abroad. Assets--foreign exchange and deposits--other sectors includes a part of the net foreign exchange inflows of the household sector which is not classified on the current account, and which amounts to 85% of the unexplained foreign exchange inflows to the household sector.

Liabilities--trade credit has been compiled since the first quarter of 1996, and includes data on loans with a maturity below 90 days granted by foreign suppliers to Croatian importers. From the first quarter of 1999 on, this item includes data on advances granted by foreign purchasers to Croatian exporters for exports of goods, as well as data on long-term and short-term (from 91 days to 1 year) trade credits received by the government and other sectors.

Data on credits received from abroad and corresponding arrears are shown by institutional sectors. They are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Currency and deposits includes changes in those foreign exchange and kuna foreign liabilities of the monetary authorities (CNB) and banks based on current accounts, time accounts, Loro letters of credit, guarantees, sight deposits and demand deposits.

Changes in the foreign exchange reserves of the Croatian National Bank on a transactions basis are estimated using accounting data on the stock of foreign exchange reserves in particular currencies at the end of the months. In

the estimation of transactions in the period from 1993 to the first quarter of 1999, changes in the original currencies were transformed into dollar changes using the average monthly exchange rate of the currency in question against the US dollar. Starting from the second quarter of 1999, the source of data on changes in international reserves has been a Report on International Reserves Transactions compiled by the CNB Accounting Department.

Table H6: International Reserves and Banks' Foreign Exchange Reserves

The international reserves of the Croatian National Bank are shown according to the methodology contained in the *Balance of Payments Manual* (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves include Special Drawing Rights, reserve position in the International Monetary Fund, foreign currency, and deposits at foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of commercial banks include foreign currency and domestic commercial banks' deposits at foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

Table H7: International reserves and foreign currency liquidity

International reserves and foreign currency liquidity are shown in accordance with a Template on international reserves and foreign currency liquidity, drawn up by the IMF. A detailed explanation of the Template is given in "Data Template on International Reserves and Foreign Currency Liquidity – Operational Guidelines, October 1999" issued by the IMF.

The first part of the Template shows total assets of the Croatian National Bank in convertible foreign currency. Official international reserve assets (I.A.) show only those types of assets that are readily available to the CNB at any moment for bridging international payments mismatches. Official international reserves include: short-term foreign negotiable debt securities, foreign currency cash, foreign currency sight deposits, foreign currency

time deposits which can be withdrawn before maturity, foreign currency time deposits with a remaining maturity of less than three months, reserve position with the IMF, special drawing rights, gold, and reverse repos with foreign currency negotiable debt securities. Other foreign currency reserve assets of the CNB (I.B.) include foreign currency time deposits with a maturity of over three months.

The second part of the Template shows fixed predetermined foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds) that fall due in the next twelve months. Foreign currency loans, debt securities and deposits (II.1.) include future interest payments on banks' foreign currency reserve requirements with the CNB (only interest payments for the next month are included), payments of future maturities of foreign currency CNB bills, future principal and interest payments on loans from the IMF, and future principal and interest payments on the central government's foreign currency debts (excluding extrabudgetary funds). Aggregate short and long positions in forwards and futures in foreign currency (II.2.) include future collections (+) or payments (-) arising from currency swaps between the CNB and domestic commercial banks (temporary sale or purchase of foreign currency). The item Other (II.3) includes future payments arising from repo agreements with foreign currency negotiable securities.

The third part of the Template shows predetermined contingent foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds), which fall due in the course of the next twelve months. Contingent foreign currency liabilities (III.1) include future principal and interest payments on foreign loans guaranteed by the central government, and banks' foreign currency reserve requirements. (The inclusion of reserve requirements in foreign currency is based on the assumption that there will be no changes in ratios or in the base of foreign currency reserve requirements, which comprises household deposits in foreign currency with remaining maturities of up to three months). Undrawn credit lines show potential inflows (+) or outflows (-) which would arise from drawdowns under these credits.

The fourth part of the Template lists memo items. Short-term, domestic currency debt

indexed to foreign currency (IV.a) shows obligations arising from the Law on the Transformation of Household Foreign Exchange Deposits into the Public Debt of the Republic of Croatia, which fall due in the next 12 months. Pledged assets (IV.c) show time deposits in foreign currency with maturities of over 3 months listed in item I.B. which are also a pledge. Repo transactions with securities show the value of collateral that is the subject of repo agreements and reverse repo transactions with securities as well as how these transactions are registered in the Template. The currency structure of international and other foreign currency reserves shows the foreign currency structure of the total foreign currency assets of the CNB (section I).

Table H10: Indices of Effective Exchange Rate of the Kuna

Index of the nominal effective exchange rate of the kuna is a weighted geometric average of the index of bilateral exchange rates of the kuna against the euro, US dollar, Swiss franc, British pound and Slovenian tolar. The weights are determined based on the average share of a particular foreign currency in the structure of the current account of the balance of foreign currency transactions between July 1996 and January 2000. The year 1995 is a base period for calculating the index. The index of the nominal effective exchange rate is an aggregate indicator of the average value of national currency against a basket of currencies. An increase in the index of the nominal effective exchange rate of the kuna in a certain period indicates that the kuna has depreciated against the currency basket. The index of the real effective exchange rate is a weighted geometric average of the index of bilateral exchange rates of the kuna corrected for the relevant relative price indices (the ratio of price indices in partner countries and domestic prices). Producer price and retail price indices are used, in particular the total harmonized retail price index for the Economic and Monetary Union member countries. Data for the last two months are preliminary.

Table H11: External Debt structured by Domestic Sectors

According to a new methodology in force starting in March 2000, external debt is defined

as the total of liabilities of residents, including: deposits of foreign legal entities and individuals (these deposits were not included under the old methodology), loans granted by foreigners with an original maturity longer than 90 days (loans for financial purposes are counted regardless of their maturity) and bonds and money market instruments issued on foreign markets (at face value).

External debt by domestic sector is shown in the same manner as in the Capital and Financial Account of the BOP:

- 1) Direct Investments – include borrower lender transactions that are interrelated by ownership (borrower or lender owns more than 10 percent of the other);
- 2) Government – in addition to Central Government, this item includes Government Funds, the Croatian Bank for Reconstruction and Development, local government authorities and funds;
- 3) Croatian National Bank;
- 4) Banks - banking institutions and saving banks;
- 5) Other domestic sectors – consist of other financial institutions (other than banks and savings banks), enterprises and households.

Each sector is further divided into Portfolio and other investments. Portfolio investments include bond and money market instruments. Other investments include currency and deposits (foreign deposits) and Credits. Credits are divided into Trade Credits (sale of goods for delayed payment) and Other Credits (all other credit obligations).

Outstanding external debt is expressed in millions of US dollars according to the CNB's midpoint foreign currency rate at the end of the period. The balance includes so-called non-reported principal payments (they should have been paid but are not statistically reported as paid) and future principal payments.

Table H12: External Debt structured by Creditors

The Table shows outstanding external debt by foreign creditors valued in the same way as in Table H8.

Table H13: External Debt and Estimated Future Payments structured by Domestic Sectors

The Table shows outstanding debt at the end of the period and the principal and interest payment projection. All data are shown at the midpoint exchange rate of the CNB at the end of period.

Projected interest payments do not include interest on foreign deposits and late interest. Payments are projected at the interest rates at the contracting time and do not reflect changes of variable interest rates.

The memo points out the outstanding publicly guaranteed debt – total and the outstanding debt of the banking sector and other sectors covered by government guarantee. The difference is the amount of the government guarantees issued to the Government sector (for example HBOR, Croatian Roads Authority, etc. included in a broad definition of Government).

Table I3: Central Government Debt

Data on central government debt are gathered from available data and are not reconciled with the Ministry of Finance of the Republic of Croatia. Central government debt consists of domestic and external debt. The sources of data on domestic debt of the central government are the following: first, the official publication of the Ministry of Finance "Ministry of Finance Monthly Statistical Review" regarding data on securities issued by the Republic of Croatia, and second, Monetary Authorities' Accounts and Deposit Money Banks' Accounts regarding data on securities issued by the central government funds and loans received. The source of data on central government external debt is the external debt statistics collected by the CNB.

LICENSED BANKS

a) licensed banks in accordance with Article 37 of the Banking Law (full authorization)

- 1.□ ALPE JADRAN BANKA d.d. Split
- 2.□ BANK AUSTRIA CREDITANSTALT CROATIA d.d. Zagreb
- 3.□ BAYERISCHE HYPO - UND VEREINSBANK AG Main branch Zagreb
- 4.□ BNP-DRESDNER BANK (CROATIA) d.d. Zagreb
