MANUFACTURING INDUSTRY

The 1.4% year-on-year growth in production recorded during seven consecutive months is the basis for an expected yearly growth of 2 - 3%. When the influence of seasonal factors is eliminated, the average monthly growth in production amounts to 1.0%, while the original data report 0.9% growth. Due to the influence of the seasonal component, production in June 1996 was 3.3% lower than in June 1995, while the irregular influence was negligible. However, activity recorded in July 1996 exceeds the activity recorded in July 1995 by 6.4%. The positive trend present in the last 10 months intensified during the last 5 months, reaching 0.8%. The picture of activities in manufacturing industry and mining is additionally illustrated by the following data: inventories of finished products are 1.9% lower than in 1995 and continue to fall. Raw materials on hand and the use of raw materials also decreased compared to the first six months of 1995 (by 0.8% and 8.4%, respectively). The use of energy and fuel for technological purposes decreased by 3.2%, employment decreased by 7.7%, while productivity of labor increased by 8.9%. Real value added in manufacturing industry shows the same tendencies as the indicator of the physical volume, achieving a 10% year-on-year monthly growth (6% cumulative growth). With regard to the sectoral distribution of production, the most significant growth was recorded in the investment goods industries (11.8%). Growth in intermediate products approximately matches growth in aggregate industry, while production of investment goods lags behind 1995 levels (-0.8%). Activity in the three major industrial branches in each group was as follows: in the investment goods group, the most significant

CASH FLOW OF REAL VALUE ADDED COMPONENTS IN MANUFACTURING SECTOR - Constant prices, January 1992

year-on-year growth was achieved by the shipbuilding industry (31.0%), with a more permanent (since May 1995) and quite steep growth of the trend cycle (at rate of 2.3%). Following a year of stagnation, the production of electrical equipment dropped by 7.0% on the year-on-year level. Yearly activity in the machine building industry was over 14.0% higher, while the trend-cycle stagnated for the first seven months. The electric power industry recorded the largest year-on-year growth (24.1%) and the longest upward trend (since January 1995) among intermediate goods industries. Activity in the chemical industry increased by 5.1% compared to 1995, while its trend-cycle has been growing since July 1995 at the rate of 0.7%. Production of petroleum products decreased by 16.1% compared to 1995, with an expected continuation of a mildly downward trend. Among consumer goods industries, production of foodstuffs recorded a 2.5% year-on-year decrease, and a 1.6% decrease in trend in the last seven months. Production of finished textile products was characterized by a significant year-on-year decrease (12.5%), and an increase in activity in the last four months (1.1% trend growth). Production of finished wood products was 2.3% lower than in the same period in 1995, but its trend cycle has been growing for the last nine months, at a rate of 1.7%.

The three-month decrease in unemployment did not continue in July. Unemployment was 1.8% higher than in June 1996, and 8.1% higher than in July 1995. At the same time, the year-on-year employment rate in the public sector dropped cumulatively by 5.1%, i.e. monthly by 4.6%.

TRADE

Excluding seasonal influences, turnover recorded a 8.8% year-on-year cumulative growth, with July turnover 15.5% higher than that recorded in July 1995. This increased turnover is in line with the increase in household income and household spending on goods and services, as well as with revived tourism (number of bed/nights increased by 37.7% compared to 1995). A more constant and more stable growth of the trend cycle was stabilized during the last three months at a level similar to that attained at the end of 1992. 1.4% half-yearly growth of the indicator of real value added in retail trade cannot stop this year's downward movements of the trend-cycle. Another sign of recovery in trade activities is the 4.3% increase in wholesale trade compared to 1995, as well as the decrease in real stocks in retail trade (by 9.8%) and stagnation in wholesale stocks.

PRICES

The main characteristic of developments in prices in August was stability, with significant deflationary tendencies in certain segments of the price system. Retail prices and producers' prices recorded no change in August compared to July, while the cost of living index recorded a 0.8% decrease. This decrease was caused by the decrease in the prices of foodstuffs, which carry a greater weight in the cost of living index than in the retail price index. A 2.2% decrease in the price of foodstuffs in August also induced a 1% decrease in the aggregate level of goods prices.

The prices of services remained unchanged. Consequently, the aggregate index recorded a decrease, while the relative price of services stagnated

INTER-INDUSTRY RELATIVE PRICE VARIABILITY IN MANUFACTURING INDUSTRY (standard deviation)

following a sudden increase in July, which was caused by sudden increases in the prices of transportation and postal services.

In the price system, the inflationary influence of spring factors (above all seasonal increases in prices of food-stuffs, the May increase in the price of fuel, and traditionally more intense growth in the prices of services) was exhausted. Since the fundamental price level determinants (exchange rate and fiscal deficit) have been within intervals which carry no inflationary consequences, this is a period of an unquestionable price stability. Comparing the price levels in August 1996 to August 1995, inflation might seem slightly higher than the rate we have gotten used to since 1993. Namely, retail prices were 4.7% higher, while the cost of living was 6% higher in August 1996 than in August 1995. However, these figures include the inflationary effects of September last year, when prices suddenly increased in a single month by approximately 1.5%. Comparing August 1996 with December 1995 can give us a more relevant measure of inflation in the first eight months of 1996 (2.3% in retail prices and 2% in the cost of living). In major part, this inflation was caused by an increase in the prices of services (of 8.2% measured by retail prices, i.e. 6.3% measured by the cost of living). Therefore, we can be relatively sure in saying that inflation in Croatia on the December level will not exceed the level of inflation attained in 1995 (as a reminder, inflation in Croatia in 1995, amounting to 3.7%, was the lowest inflation rate recorded in any of the transitional countries.)

WAGES AND AGGREGATE DEMAND

The real wage recorded in July 1996 was 3.0% lower than in July 1995. The decrease in the real wage was slightly more significant in productive (3.7%) than in non-productive branches of the economy (1.1%). The average net wage paid in August was 1.5% higher than the average of the last seven months, and 5.9% higher than the 1995 average. Its trend cycle has been oscillating within relatively stable margins during all of 1995 as well as in 1996.

Data on households income and aggregate demand are available for the first six months of 1996. Earnings of the households sector observed through the aggregate of wage payrolls, social security payments, remuneration from employment by direct hire and by contract, and earnings from the sale of goods and services recorded in 1996, exceeded the earnings recorded in 1995 by 7.8%. This increase induced an increase in expenditures for goods and services, as well as the (above mentioned) increase in retail turnover.

Domestic demand was 5.7% higher than in 1995, with positive change achieved in personal (8.1% increase) and government spending (4.4% increase), while registered investment spending decreased by 31.1%. Such a real increase in aggregate demand creates room for revival of industrial production and economic activity as a whole. Since investment activity is not satisfactorily encompassed in the above figure, aggregate government spending on capital assets and capital transfers shows a six-month real growth of 76.9%. Their absolute value in 1996 amounts to 1,400 mil kuna. It is partly covered by capital earnings (507 mil kuna), while the rest is financed from current earnings (which confirms the wish for less transfer of budget earnings into current spending).

STRUCTURE OF REAL EXPENDITURES

MONETARY DEVELOPMENTS

Final monetary data for July bring nothing unexpected. Intense seasonal developments ended at planned levels.

The money supply increased by 802 mil kuna (or 8.5% more than estimated by the projection). Now that we have a series of three-years of post-inflationary data at our disposal (the same rules of monetary statistics applied during the entire period), we can observe the growth of the aggregate with a somewhat longer horizon. Taking into consideration that in July 1994 re-monetization was still in process, while in 1995 and 1996 part of the "old" foreign currency savings was unfrozen, July growth rates in all three years were of similar intensity.

Following the release of "old" foreign currency savings in July, foreign currency deposits grew by 1216 mil kuna, while kuna deposits increased by the usual (modest) 119 mil kuna.

Preliminary data for August show quite moderate developments compared to July. By August 28, cash had grown by 172 mil kuna, while most other aggregates were well within planned values.

Developments in the Balance of the NBC were much more interesting. Within the battle for the exchange rate, the NBC bought US\$ 152.3 mil, out of which banks were obliged to buy US\$ 43.4 mil back from the NBC by August 28. 570.9 mil kuna represents the net monetary effect.

As far as foreign exchange reserves and liquidity are concerned, the result is foreseeable and momentary. Foreign exchange reserves of the National Bank of Croatia amounted to 2.34 bil kuna on August 28, accompanied by truly exceptional liquidity. Bal-

ances on banks' giro accounts with the NBC were never below 300 mil kuna in August. At the end of the month, the balance of 800 mil kuna was not unusual. However, we cannot entirely ignore the danger high liquidity represents as a potential source of increased investments in September. Stagnation of investment in July (delta barely 15 mil kuna) is consequent to financial rehabilitation of Riječka Banka (an extraordinary event which cannot be considered proof that the high liquidity did not and would not cause increased growth of credit aggregates).

The high rate of purchase of voluntary treasury bills (with an extremely low interest rate) enables sterilization of the excess liquidity. However, these treasury bills also represent a part of banks' free reserves which, once mature, can be invested elsewhere.

Such developments caused the growth rate of reserve money (10.5% at the end of the months) to significantly exceed the planned growth of 1.6%. Net foreign exchange assets of the NBC also grew by a significant 7.8% (instead of the expected 2%). At the end of August, on August 28, the situation improved thanks to a US\$ 43 mil repurchase coming due and to an extremely successful auction of voluntary treasury bills. Giro accounts fell (!) to 724 mil, while reserve money fell to 8,206 million.

In defense of the upper limit of the exchange rate, the NBC bought off more foreign exchange than predicted. It was the second consecutive month of intense buy-out. The exchange rate stabilized, at the same time filling and overflowing all channels of liquidity. Hopefully, this will have no negative influences on prices.

EXCHANGE RATE

After reaching its five-year high on August 15, the kuna mildly depreciated in relation to the German mark in the last ten days of August.

The mean NBC rate on August 15 was exactly 354 kuna for 100 German marks. At the end of the month, the exchange rate "climbed" back up to 355.86 kuna for 100 German marks. Record foreign exchange interventions successfully stopped the nominal appreciation, turning the kuna slightly toward depreciation. Bearing in mind the seasonal tendencies in supply and demand for foreign currency, it was reconfirmed that market-determined parameters push the exchange rate in both directions. The central bank merely speeds up market signals with its interventions, making them more transparent, thus bringing discipline to potentially destabilizing expectations.

The real effective exchange rate is more difficult to control in the short term, because its level is influenced by developments in the price system, which do not have to have any direct short-term relations with monetary policy. Above all this refers to the above-mentioned increase in prices of services, which currently represents the main cause of real appreciation. Our forecast for August indicated a real appreciation of 0.8%, following 0.4% real appreciation of the kuna in June and July. However, it should be stressed that current level of the real exchange rate is still lower than the level recorded in mid-1995, and that recorded at the beginning of the implementation of the Stabilization Program. Another reason for not getting upset over appreciation is the fact that the current account of the balance of payment records extremely favorable developments.

BALANCE OF PAYMENTS

Favorable tendencies continue. The current account deficit in the first five months was less than US\$ 500 mil (i.e. 28% lower than the deficit recorded in the same period of 1995). Contributing to the decrease in the deficit are the recovery of tourism (13% in the first five months), transportation (5.3%) and especially transfers (47.9%), with approximately the same balance of merchandise trade as in 1995. Also the data on merchandise exports and imports for July indicate some positive tendencies. While cumulative dollar amounts still show lower values of imports and exports than in 1995 (mainly due to changes in inter-currency relations on the world market), the July data show higher exports and lower imports than in July 1995. Converted into kuna, this means that the level of cumulative exports was only 0.6% lower in 1996, while the level of imports was 0.4% higher in the first seven months of 1996 than in the same period last year. It should be noted that exports to convertible markets was cumulatively 0.4% higher while imports was 0.6% higher compared to 1995.

The structure remains the same. Exports stagnate due to restructuring, which is reflected in decreased exports of finished, labor intensive products, above all textile products, clothes, footwear and furniture. Decreased exports of transportation vehicles along with the rapid growth of shipbuilding indicate expected significant amounts in exports. Since there are some indications that unfavorable tendencies will turn around, a certain increase in exports can be expected in the second half of the year. It will follow the unexpected increase in imports, so that the total balance of payment result, expected in 1996, remains optimistic, based on strong arguments.

ANNUAL INTEREST RATE ON THE ZAGREB MONEY MARKET

DEPOSIT MONEY BANKS' ANNUAL INTEREST RATES

INTERENTERPRISE ARREARS REPORTED TO PAYMENTS INSTITUTE

MONEY MARKET AND INTEREST RATES

Interest rates on the Money Market Zagreb decreased by more than 10% in the last two months, achieving an all-time low of 8% on a yearly level (average daily interest rate). Liquidity of the banking system is high (the highest amounts ever on banks' giro accounts, hardly any banks are illiquid at the end of the day), causing little demand on the Money Market. High liquidity is caused also by the net effect of NBC interventions on the foreign exchange market (571 mil kuna).

With such low interest rates, banks can calculate where to invest their surpluses, while potential borrowers, armed with arguments of high liquidity, are becoming very demanding in requesting even lower interest rates. What keeps many banks at the Money Market as potential borrowers is a possibility of short-term investment of their surpluses (five to ten days or with revocation clause). Large number of banks, however, are orienting to purchasing voluntary treasury bills, giving preference to 35 days (two thirds of the total nominal purchases, which amounts to 941.4 mil kuna). Demand for voluntary treasury bills is very high (purchases have doubled in the last three months, despite three times lower interest rates). At the last auction, the average interest rates amounted to 7.98% on a yearly level for 35 days and 9.25% for 91 days. We should be warned by the fact that there has been no purchase of 182 days bills in the last five auctions. Banks do not wish to immobilize their assets in the longer run.

In dealings with their clients, banks do not lower their interest rates as easily and readily as they do on the Money Market. July data show that the "toughest" lending interest rates fell by one percent. Those were, in major part, short-term loans. Interest rates on short-

term loans without currency clauses were around 23%, while interest rates on short-term loans with currency clauses were around the level of 25.5%. Banks' readiness to lower the price of their services and their belief in the continuation of the current situation on the Money Market remains to be proven in this market.

Now that liquidity can no longer be used as an alibi, legal regulations on the collection of debts and protection of creditors remains a problem. Continuous growth in the number of unpaid debts does not support the optimism radiating from the Money Market.

STATE BUDGET

The giro account of the state budget was well filled at the beginning of August, as opposed to July. A small peak emerged even before the middle of the month, followed by a period of minimum giro account balance. In August, just like in July, the state budget used a credit from the NBC in the amount of 100 mil kuna. The balance on the giro account shows that the state budget most likely continues to support the high liquidity of the banking system. We can say that it is a kind of a seasonal characteristic for the giro account of the state budget to be almost empty around this time of the year, with the government struggling to meet its obligations.

Classification and Presentation of Data on Claims and Liabilities

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. Institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and nonbank financial institutions. The central bank is the National Bank of Croatia (NBC). Deposit money banks are institutions granted, by the National Bank of Croatia, the permission to perform banking business services in accordance with the Law on Banks and Savings Banks. Other banking institutions comprise savings banks. Since July 1995 savings banks have been under auspices, and have operated with the permission of the NBC. Nonbank financial institutions are financial institutions not classified as banks or other banking institutions (insurance companies, investment funds, savings cooperatives etc.)

The central government and funds comprises government institutions including Croatian Roads Company, Bank Rehabilitation Agency and Croatian Guarantee Agency, and following central government funds: Croatian health insurance fund, state retirement funds, employment agency, Croatian Privatization Fund, Croatian water company and Croatian Bank for Reconstruction and Development. Other domestic sectors are other central government funds (those not classified under the central government and funds sector), local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local governments and funds (including other republic funds, local government authorities and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their kuna equivalent at the midpoint NBC exchange rate at the end of the reporting period.

Table A1: Monetary and Credit Aggregates

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates.

Reserve money has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

Money (M1) is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with NBC by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

Broadest money (M4) comprises *Money (M1)*, savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1).

Net domestic assets are defined as a difference between total liquid assets and foreign assets (net).

Domestic credit comprises DMBs' claims on other domestic sectors, other banking institutions and nonbank financial institutions.

Table B1: Monetary Survey

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

Foreign assets (net) are the difference between total foreign assets and total foreign liabilities of the NBC and DMBs.

Domestic credit is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the NBC and DMBs.

The money is the sum of currency outside banks, deposits by other banking institutions with the NBC, deposits by other domestic sectors with the NBC and DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

Items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while item *Restricted and blocked deposits* represent the sum of correspondent items from Monetary Authorities Accounts (excluding DMBs blocked deposits with the NBC) and DMBs Accounts. *Other items (net)* are unclassified liabilities decreased by unclassified assets.

Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size

The table shows the total number of DMBs and savings banks which report monthly to the NBC. Their operation is shown in the DMB's/savings banks' accounts. *Total number of reporting DMBs* includes former branches of banks with their headquarters in the former Yugoslavia, which are currently under liquidation.

Due to the fact that savings banks were not legally obliged to report their operation to the NBC until July 1995, the total number of savings banks refers only to those savings banks which reported voluntarily to the NBC. In June 1995, coordination of the registration of savings banks with the Law on Banks and Savings Banks, and reporting to the NBC became compulsory. Since June 1995, total number of savings banks reporting to the NBC has corresponded with the total number of registered savings banks. The table also shows the classification of reporting DMBs and savings banks according to their total assets. Former branches of banks with their headquarters in the former Yugoslavia are classified in relation to the size of their total assets decreased by households' foreign currency deposits transferred to resident banks.

Table C1: Monetary Authorities Accounts

The table reports data on claims and liabilities by monetary authorities. *Foreign assets* include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims.

Claims on central government and funds are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming the incoordination between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* is a counter-entry to the liability to the IMF based on the succession of membership in that institution.

Claims on other domestic sectors are loans and overdue claims on other domestic sectors.

Claims on DMBs are credit to DMBs, deposits by the NBC with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Overdue claims on DMBs comprise loans due, giro account overdrafts and banks' undiscipline in allocation and maintenance of statutory reserve requirements.

Reserve money consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the NBC, other banking institutions' deposits and other domestic sectors' deposits with the NBC. *DMBs' deposits* are: giro account balances, statutory reserves deposited on a special account with the NBC as well as NBC bills on obligatory basis. *Deposits by other banking institutions* are: giro account balances of savings banks as well as statutory reserves of savings banks' deposited on a special account with the NBC. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances (this refers to accounts opened with the NBC by October 1994, since when they have been in the process of transition into deposits with the DMBs).

Restricted and blocked deposits are mainly import deposits. Blocked foreign currency deposits are funds deposited on a special account with the NBC for the purpose of covering the unpaid liabilities due to foreign creditors.

Foreign liabilities include use of IMF credits and liabilities to international financial institutions.

Central government and funds deposits are demand deposits and foreign currency deposits of the central government and funds with the NBC.

NBC bills are NBC bills on voluntary basis.

Capital accounts include reserves, funds, undistributed profit and f/c revaluation adjustment (net).

Other items (net) are unclassified liabilities decreased by unclassified assets of the NBC's accounts.

Table D1: Deposit Money Banks' Accounts

DMBs accounts include data on Croatian DMBs' claims and liabilities and data on claims and liabilities of former branches of banks with their

headquarters in former Yugoslavia, which are now in the process of liquidation. DMBs' mutual claims and liabilities are consolidated.

Reserves with the central bank are: kuna cash in vaults and kuna deposits with the central bank.

Foreign assets are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, nostro letters of credit and other collateral's with foreign banks, securities, loans, equities and arrears. Unregulated claims on institutions of former Yugoslavia are shown separately.

Claims on central government and funds are the following forms of claims in kuna and foreign currency: securities, loans, equities and arrears (including claims for interest charged and due 30 and more days prior to the reporting date). Main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

Claims on other domestic sectors include the following claims in kuna and foreign currency: securities, loans (including acceptances), equities and claims due.

Same forms of kuna and foreign currency claims are included in claims on other banking institutions and nonbank financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

Items *Demand deposits, Savings and time deposits, Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and nonbank financial institutions.

Demand deposits include giro and current accounts balances and other transferable deposits, decreased by currency in the payment system, i.e. checks in banks' vaults and checks in collection.

Savings and time deposits are: kuna sight deposits as well as kuna time and notice deposits.

Foreign currency deposits are: foreign currency sight deposits as well as foreign currency time and notice deposits.

Bonds and money market instruments are: banks' liabilities for securities issued (net) and loans obtained.

Foreign liabilities comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, loro letters of credit and other collateral's, savings and time deposits, loans received

and liabilities due. Unregulated liabilities to institutions in former Yugoslavia are shown separately within foreign liabilities.

Central government and funds' deposits are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

Credit from central bank comprises loans obtained from the NBC and deposits by the NBC with DMBs. Repurchase of securities is also considered and treated as loan.

Restricted and blocked deposits comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, nonbank financial institutions, central government and funds as well as foreign legal entities and individuals; households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, foreign currency deposits by domestic sectors to cover outstanding liabilities due to foreign creditors and foreign currency deposits with former branches of banks with their headquarters in former Yugoslavia.

Capital accounts are share capital, reserves, provisions, current profit or loss, undistributed profits and f/c revaluation adjustments (net).

Other items (net) are unclassified liabilities decreased by unclassified assets.

Tables D2-D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

Claims and Liabilities related to former branch banks with their headquarters in former Yugoslav bank's branches are shown under the separate item *Adjustment for former branch banks* with an exception of Table D8: Foreign currency deposits with DMBs, which does not contain this item. Foreign currency deposits with former branch banks are classified as restricted and blocked deposits, and therefore shown as a separate item in the Table D12.

Table D2: Deposit Money Bank's Foreign Assets

This table shows DMBs' claims on foreign legal entities and individuals.

Foreign assets of the DMBs comprise foreign assets in kuna and foreign currency as well as DMBs' claims on the former Yugoslavia and the

adjustment for former branches. Item *Claims on former Yugoslavia*, reported separately in its full amount in the Table D1, is in the Table D2 divided into claims of the DMBs (shown under item *Claims on former Yugoslavia*) and claims of former branches (shown as a separate item within *Adjustment for former branch banks*).

Claims on foreign banks and *Claims on foreign nonbanks* (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency. Within *Claims on former Yugoslavia*, those in kuna and in foreign currency are shown separately.

Table D3: Deposit Money Banks' Claims on the Central Government and Funds

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

Bonds arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia.

Big bonds are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

Other claims are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans, equities, postponed interest arrears (claims for interest due but not payable before relations with foreign creditors are regulated) and arrears (including claims for interest due 30 and more days prior to the reporting date).

Adjustment for former branch banks refers entirely to other central government's bonds.

Table D4: Deposit Money Bank's Claims on Other Domestic Sectors

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: bills of exchange, commercial bills, bonds, other short-term securities, loans and advances (including acceptances and commodity futures), equities and arrears.

By October 1994, foreign currency loans were granted only when counterparted by DMB's loan abroad, in bank's name and on behalf of the final beneficiary of the loan. Due to the fact that foreign debts are still not entirely regulated, there is an item *Postponed interest arrears*. It refers to claims on interest due at the original due date, but the

obligation to pay is postponed until relations with foreign creditors are regulated.

Adjustment for former branch banks refers in greater part to foreign currency loans to enterprises.

Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances and commodity futures.

The above data do not include loans of former branch banks.

Table D6: Demand Deposits with Deposit Money Banks

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and nonbank financial institutions' giro and current accounts balances, as well as other transferable deposits, decreased by currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection.

Adjustment for former branch banks mostly refers to demand deposits by private enterprises and households.

Table D7: Time and Savings Deposits with Deposit Money Banks

The table shows *Savings deposits of households* in kuna as well as *Time and notice deposits* in kuna by other domestic sectors, other banking institutions and nonbank financial institutions with DMBs.

Adjustment for former branch banks refers in larger part to households' savings and time deposits.

Table D8: Foreign Currency Deposits with Deposit Money Banks

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and nonbank financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

Foreign currency deposits with former branch banks are not included in this table.

Table D9: Bonds and Money Market Instruments

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and nonbank financial institutions.

Money market instruments (net) comprise DMBs net liabilities for NBC bills, bills of exchange (issued and accepted) and other securities issued.

Bonds (net) comprise DMBs net liabilities for kuna and foreign currency bonds issued.

Other domestic borrowings comprises loans received, reported total and classified by institutional sectors.

Table D10: Deposit Money Banks' Foreign Liabilities

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities, foreign kuna liabilities, DMBs' liabilities to the former Yugoslavia and adjustment for former branches. Item *Liabilities to the former Yugoslavia*, which is reported separately in the Table D1, is here divided into part of the liabilities referring to DMBs (shown as item *Liabilities to the former Yugoslavia*) and the part referring to of former branches (reported as a separate item within the *Adjustment for former branch banks*).

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments). Within liabilities to the former Yugoslavia, liabilities in foreign currency are reported separately from kuna liabilities.

Item *Postponed interest arrears* on foreign currency loans showing within foreign currency liabilities refers to liabilities for interest due on the original due date, but payable after the regulation of relations with foreign creditors.

Table D11: Central Government and Funds Deposits with Deposit Money Banks

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, kuna time and notice deposits, and kuna

loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as foreign currency time and notice deposits.

The table does not state the item *Adjustment for former branch banks* because the salvage value of former branch does not include liabilities to the central government and funds.

Table D12: Restricted and Blocked Deposits with Deposit Money Banks

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, nonbank financial institutions and foreign legal entities and individuals with DMBs.

Restricted deposits include three categories of deposits: restricted (kuna and foreign currency) deposits, blocked foreign currency deposits and foreign currency deposits with former branch banks.

Blocked foreign currency deposits include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, as well as domestic sectors' deposits regulated by the Decree Law on the Settlement of Arrears to External Creditors.

Table E1: Savings Banks' Accounts

Savings banks' accounts include the data on savings banks' claims and liabilities. Savings banks' mutual claims and liabilities are consolidated.

Reserves are savings banks' kuna cash in vaults and kuna deposits with the NBC.

Foreign assets refer to foreign currency in savings banks' possession either within arrangements which are in the process of liquidation due to the adjustment to the new Law on Banks and Savings Banks or within arrangements with DMBs regarding performing currency exchange transactions.

Claims on central government and funds are all kuna and foreign currency claims on the Republic of Croatia and central government funds.

Claims on other domestic sectors are the following forms of kuna and foreign currency claims: securities, loans, equities and claims due. Claims on local governments and funds, enterprises and households, are shown separately within this item.

Claims on DMBs include the following forms of kuna and foreign currency claims on DMBs: savings and time deposits, securities, loans, equities

and arrears. Item *Claims on nonbank financial institutions* comprises the same forms of kuna and foreign currency claims.

Demand deposits comprises other domestic sectors' and nonbank financial institutions' kuna giro and current accounts balances as well as other transferable deposits.

Savings and time deposits are households' savings deposits in kuna as well as time and notice deposits by other domestic sectors, domestic deposit money banks and nonbank financial institutions.

Foreign currency deposits are households' foreign currency savings and time deposits. These deposits, however, represent transactions in liquidation owing to adjustment to the new Law on Banks and Savings Banks.

Bonds are liabilities by other banking institutions for securities issued (net), as well as loans received from other domestic sectors, domestic DMBs and nonbank financial institutions.

Foreign liabilities are foreign savings and time deposits in foreign currency. These deposits represent transactions in liquidation owing to adjustment to the new Law on Banks and Savings Banks.

Central government deposits are kuna time and notice deposits by the Republic of Croatia and central government funds.

Credit from central bank comprise kuna loans obtained from the National bank of Croatia.

Capital accounts are: share capital, reserves, provisions, current profit or loss, undistributed profit and *l/c* revaluation adjustment (net).

Other items (net) are unclassified assets decreased by unclassified liabilities.

Table F1 - Credit Rates of National Bank of Croatia

The table shows interest rates used by the NBC to calculate and charge interest on loans and on all other claims.

Lending NBC interest rates are being set by special decrees of the Council of the National Bank of Croatia, on annual basis. Exceptionally, since July 1995, interest rate charged by NBC on lombard credits has been 1.5% higher than the weighted average interest rate on NBC bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate is higher than 16.5. Congruently, from July 1995 onwards, the table reports weighted average interest rate on lombard credits.

Time series presented in the table contain certain breaches, due to changes in NBC's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular

credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for payments from households' current accounts, and since October 1994 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day.

Interest rates reported in column 9 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 10. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other form of financial undiscipline, in accordance with the late interest regulations (shown in column 11).

Until July 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 10). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for other forms of financial undiscipline, shown in column 11.

Table F2: Deposit Rates of National Bank of Croatia

The table shows interest rates paid by the NBC on funds deposited with the NBC as well as on securities issued.

Interest rates paid by the NBC for appropriated statutory reserve funds are being set by the Council of the NBC. Until 7 October 1993, NBC was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, NBC paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on NBC bills on obligatory basis are set by the Council of the NBC.

Until October 1993, interest rates on NBC bills on voluntary basis were also set by the Council of the NBC, while since November 1993, they have

been set at NBC bills' auction sales. Congruently, since November 1993, columns 5, 6 and 7 report weighted average interest rates attained in auctions of the NBC bills.

Until October 1994, interest rates on NBC bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Table F3: Deposit Money Banks' Reserves on Obligatory Basis

This table shows data on monthly averages of day-to-day balances of reserves on obligatory basis by DMBs with the NBC.

Reserve requirement (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the NBC, or to maintain (in average) on their giro accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this requirement by registering NBC bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base (NBC prescribes different reserve requirement ratios for different categories of deposit).

Column 5 shows the portion of the reserve requirement banks are required to deposit on a special statutory reserves account with the NBC (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the NBC).

Column 6 shows the percentage of the statutory reserves deposited with the NBC in the total reserve requirement.

Column 7 shows the total amount of other deposits with the NBC on obligatory basis, which comprises NBC bills on obligatory basis, part of NBC bills on voluntary basis used by the banks to maintain the prescribed minimal liquidity (LAR), and special statutory reserves.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the NBC on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average giro account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the NBC bills on obligatory basis and inaccurately calculated special statutory reserves.

Table F4: Deposit Money Banks' Liquidity Indicators

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity.

Column 3 shows free reserves, defined as bank's total reserves (on giro accounts and in vaults) decreased by the minimal average giro account and treasury balance, as prescribed by instruments of the NBC (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October 1994), regular loans for maintenance of day-to-day liquidity (until November 1994), use of funds exceeding those available on bank's giro account (until October 1994), initial loans (since October 1994), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), as well as outstanding liabilities due to the NBC.

Column 6 reports monthly average of day-to-day balances of NBC bills on voluntary basis (until December 1994, this amount is decreased by the portion of voluntarily registered NBC bills used by banks to maintain the prescribed minimal liquidity).

Table G1: Deposit Money Banks' Credit Rates

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis.

Columns 3 and 4 show interest rates on the interbank daily and overnight money markets, according to information received from Money Market Zagreb. From December 1993 until May 1995, interest rates on overnight loans were identical

to the NBC discount rate. Until December 1993 and since July 1995, interest rates charged for overnight loans equaled to daily weighted average interest rates reached on the daily money market.

Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reported month, with the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Column 8 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 9, 10 and 11) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

Table G2: Deposit Money Banks' Deposit Rates

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US

dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other foreign currencies are not included in the data reported in this table.

Basis for calculation of weighted averages are end-of-month balances of deposits. Exceptions are kuna and foreign currency time and savings deposits for which weighted averages are calculated (since July 1995) based on amounts of those deposits received during the reported month. Weighted averages of interest rates on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as a credit collateral are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not included into the calculation of weighted averages.

Table G3: Deposit Money Banks' Trade with Foreign Exchange

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, NBC). Source of data are DMBs periodic reports on trading with foreign exchange, sent to the NBC on a regular basis. The amounts are stated in Deutsche Mark, converted from other foreign currencies using the NBC's midpoint exchange rate (reporting period average).

Table H1-H4: Balance of Payments

Balance of payments is based on the methodology of the International Monetary Fund (Balance of Payments Manual, fifth edition, 1993). Sources of data are following: reports of the State Bureau of Statistics, reports of transportation companies, reports of deposit money banks, Croatian Bank for Reconstruction and Development and the National Bank of Croatia.

Data on international flows of merchandise trade commodities are compiled by the State Bureau of Statistics on the basis of the customs declaration forms. According to the existing methodology applied by the CBS, commodity imports include temporary commodity imports as well. Other data required for compilation of the balance of payments are collected and processed directly by the NBC.

Services are, except for the data on the international cargo and passenger transport, reported on cash-flow basis.

Earnings from traveling (tourism), are calculated as a total value of: purchase of foreign currency and checks from nonresident natural persons, foreign exchange remittances to accounts owned by companies offering tourist services, sales of domestic currency and traveler's checks abroad, sales of domestic goods and services for foreign currency to nonresident natural persons, foreign exchange checks and credit cards charges in the country, sales of foreign goods to nonresident natural persons, purchase of foreign currency in casinos, 25% of the value of purchase of currency and traveler's checks from resident natural persons and 25% of the value of cash and traveler's checks deposited to resident natural persons foreign currency accounts.

Expenditures from traveling (tourism) industry, are calculated as total value of: payments for business travels, scholarships and specialization, payments for tourist trips organized by domestic tourist agencies, 25% of the value of sales of foreign currency and traveler's checks to resident natural persons and 20% of the value of currency and checks drawn from resident natural persons' foreign currency accounts.

Other services include investment works, construction and installation projects abroad, representation fees, insurance, freight and forwarding services, postal services, costs of Croatian representative offices abroad, unclassified services and 25% of the value of foreign currency transfers from foreign currency accounts to foreign countries.

Current transfers are classified into two categories: transfers to the central government and transfers to other sectors. Transfers to and from the central government consist of retirement and social welfare payments, financial aid payments, gifts, as well as of import and export bearing no payment obligation. Credits of transfers to other sectors represent the total value of foreign remittances received. Debits of other sectors transfers represent 75% of the value of transfers from resident natural persons foreign currency accounts to foreign countries.

Direct foreign investments are calculated partly from the data on imports of goods to be invested in resident corporations, partly from the data on payments made by nonresidents in connection with investments in the Republic of Croatia.

Data on other investment are structured into following institutional sectors: monetary authorities, general government, banks and other sectors. The

scope of sectors somewhat differs from the corresponding scope in the balance sheets of financial institutions. General government sector includes the central government and funds, local government authorities and local funds. Banking sector includes DMBs.

Item *Other investments - assets - banks currency and deposits*, represents the change in total foreign currency held by banks authorized to do business with foreign countries, i.e. banks with full authorization. Inflow from foreign countries, reported in the item *Other investments - assets - other sectors - currency and deposits*, is calculated as a difference between the sum of 75% of the value of currency and traveler's checks deposited to resident natural persons' foreign currency accounts and 75% of the value of currency and checks purchased from resident natural persons and the sum of 80% of the value of currency and traveler's checks withdrawn from resident natural persons foreign currency accounts and 75% of the value of sale of currency and traveler's checks to resident natural persons.

Data on loans for all previously mentioned sectors are based in greater part on originally concluded and registered credit agreements included in the NBC database. These do not include unallocated debt of the former Yugoslavia.

Changes in the total current balances of the NBC's foreign currency reserves are calculated using current US dollars exchange rates for currencies that form the reserves, and they are denominated in US dollars on the day when the balance of payments is compiled (end of month, end of quarter or year).

Table H8: External Debt

The table shows the balance of external debt at the end of the period, in millions of US dollars, according to the NBC's midpoint foreign currency rate at the end of the period.

External debt is defined as total value of following liabilities for foreign credits: outstanding debt (including principal arrears) and interest arrears.

Data are formed following the criteria of the final user, i.e. these include foreign credits used by the final users from the Republic of Croatia (and also those for which the debtor to foreign country is a bank from the former Yugoslavia).

Interest arrears are estimated by using originally agreed interest rates and do not include late interest.

Short-term credits do not include the use of short-term interbank credit lines.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth, struggle, and achievement. From the first European settlers to the present day, the nation has faced countless challenges and triumphs. The story begins with the Pilgrims in 1620, who sought freedom and a better life in a new land. They established the first permanent English colony in North America. Over the years, other settlers joined them, and the colonies grew in number and size. The colonies began to develop their own identity, separate from England. They fought for their rights and eventually won independence in 1776. The new nation was born, and it began its journey as a free and democratic country. The story of the United States is a story of the American dream, of the pursuit of happiness and freedom. It is a story of the people who have shaped the nation, from the Founding Fathers to the present day. The story is one of hope and possibility, of a land where anyone can achieve their dreams. The history of the United States is a story that continues to inspire and guide us today.

LICENCED BANKS WITH FULL AUTHORIZATION

1. AGROOBRTNIČKA BANKA d.d. Zagreb
2. ALPE JADRAN BANKA d.d. Split
3. BANK AUSTRIA (CROATIA) d.d. Zagreb ¹⁾
